

Marusan Securities

- **Vision**

Enhance customer satisfaction, support growth and continue to deliver leading-edge online services at a competitive price

- **Challenge**

Reduce system complexity and improve availability for more than 10,000 online users, by consolidating multiple disparate servers, including Sun Solaris and Hewlett-Packard equipment, onto a single platform

- **Solution**

A resilient Web infrastructure comprising an IBM eServer™ zSeries® 990 system running Red Hat Linux® V7.3 and IBM z/VM® operating systems, and configured with logical partitions and integrated facilities for Linux technology

- **Value**

Slimmed space requirements by one-third; significantly reduced IT staff; lowered operational costs; and improved customer service levels
