

Did you know that...

...Anarchie Pro comes complete with online help?

Anarchie Pro has complete documentation in SimpleText format, Balloon Help, and these Tips. All the documentation is also available on the Web. (To find out how to get to our Web site click the Next Tip button below.)

Did you know that...

...Anarchie Pro has its own web site?

You can read the latest Anarchie Pro news on the Anarchie Pro Web Site at:

[<http://www.anarchie-pro.com/>](http://www.anarchie-pro.com/)

Did you know that...

...you can correct a mistake in a failed FTP transfer?

Anarchie Pro displays an Edit Retry button when a transfer fails. Clicking Edit Retry brings up a Get via FTP... window with all the information about the failed download.

In fact, if you hold the Control key down when you double click a file in a listing window a Get via FTP... window appears!

Did you know that...

...you can quickly search a single FTP site?

Choose Get via FTP... from the File menu and click the Index Search radio button. Specify the FTP site you wish to search in the Server field and what you wish to search for in the Index field, then click the Index button. Anarchie Pro then asks the FTP server to search for your file.

Did you know that...

...you can set your default Archie server?

Open Internet Config by selecting Preferences in the Settings menu and clicking the Launch Internet Config button. Click File Transfer and select your preferred Archie site from the pop-up menu. Anarchie Pro then uses this site by default when doing Archie searches.

Did you know that...

...you can go to the Stairways Web site from within Anarchie Pro?

Open the About box (from the Apple menu) and click the World Wide Web link.

Did you know that...

...you can find out how much data remains to be transferred?

During a download click the Total field and it cycles through:

- Total
- Transferred
- Remaining

Did you know that...

...you can get context sensitive help?

Balloon Help is context sensitive: the help message changes depending on where your cursor is pointing. Turn on Balloon Help by going to the Help menu and selecting Show Balloons. Turn off Balloon Help by going to the Help menu and selecting Hide Balloons.

Did you know that...

...you can update the current listing with a simple menu command?

A file listing is a snapshot of the FTP site at some point in time. Update the file listing by selecting Retry from the File menu or using the Command key equivalent of Command-R. Did you know that...
...you can edit your next download?

Hold the Control key down when you double click a file in a listing window, and Anarchie Pro brings up a Get via FTP... window with the file's details.

The Control key is a modifier that means 'Edit' throughout Anarchie Pro. Did you know that...
...you can move up a directory?

Anarchie Pro supports the same navigation keys as the Finder: in a listing window type Command-Up arrow to move up a directory, or Command-click the window's name in the title bar to view a pop-up menu of all the parent directories. Did you know that...
...you can move up multiple directories with one click?

Command-click the window's name in the title bar of a listing window and you can chose which parent directory you would like to open from a pop-up menu. Did you know that...
...you can drag files or folders to the Finder to download them?

In fact, whether you are uploading or downloading files you can drag the files or folders into or out of the listing windows.

Note: This requires System 7.5 or above You can install the Drag Manager in System 7.1 upwards. Did you know that...
...you can look at listings in order of size?

File listings in Anarchie Pro behave a lot like windows in the Finder. Select by Size in Anarchie Pro's View menu (in the Settings menu) or click Size at the top of the Anarchie Pro listing window to arrange the files in order of decreasing size.

You can also view files in order of Date, Kind, Machine, Name, Path or Zone. Did you know that...
...you can quickly delete a file or folder on an FTP site?

Drag the file or folder to the Finder's Trash can - just like any file on your disk!

You can also select the file or folder and press command-Delete.

Warning: You can not undo this process, so be careful.

Did you know that...
...Anarchie Pro is a deceptively feature rich program?

Anarchie Pro has a lot of clever features. Here are some general guides:

- The Control key is a modifier which means Edit.
- Listing windows behave like Finder windows.
- The Option key is a modifier which means 'Do it slightly differently'. Try Option-double clicking an entry in a listing window.

Did you know that...

...you can upload multiple files and folders?

Drag and drop the files or folders from the desktop into a listing window. It works just like copying files in the Finder.

Did you know that...

...you can copy and paste URLs in Get via FTP... windows?

Copy and paste a URL into one of Anarchie Pro's Get via FTP... windows, and Anarchie Pro fills out the fields for you.

Hold the Option key down to copy a URL from a Get via FTP... window.

Did you know that...

...you can email Tech Support for help from the About box?

Choose About Anarchie Pro from the Apple menu and click the Email Support link. Or check out the Frequently Asked Questions at:

[<http://www.anarchie-pro.com/anarchie/faq.html>](http://www.anarchie-pro.com/anarchie/faq.html)

Did you know that...

...you can control the way files are uploaded or downloaded?

Normally, Anarchie Pro uses Internet Config's File Mappings to determine the transfer mode for files. In the Transfer menu (in the Settings menu), you can select Text, Binary, or MacBinary to transfer all files in that mode. Select Automatic to have Anarchie Pro use Internet Config.

If you hold down the shift and option keys, your selection will be used as the default transfer mode when Anarchie Pro starts up. **Warning: this may confuse you later!**

Did you know that...

...you can upload into folders in a listing window?

Drag the files or folders you are uploading over a folder in the listing window to upload to that particular folder. The folder will highlight to indicate your upload destination.

Did you know that...

...you can store bookmarks to your favourite sites?

Select Save Bookmark... from the File menu, or hold the control key down and drag your selection to the Finder to create a Bookmark.

Did you know that...

...you can make Netscape Navigator or Internet Explorer use Anarchie Pro for its FTP transfers?

Select "Switch Internet Explorer" or "Switch Netscape" from the Settings menu to ask those programs to use Anarchie Pro for FTP transfers.

Did you know that...

...you can pay for your shareware online?

You can register through your Web browser at:

[<http://order.kagi.com/?PL>](http://order.kagi.com/?PL)

Or select Register Online... from the Apple menu.

Did you know that...

...you can view or edit text files on FTP sites?

To view a file, select it in the listing window and then choose View Selection from the Remote menu.

To edit a file, select it in the listing window and then choose Edit with BBEdit from the Remote menu.

Did you know that...

...you can rearrange Anarchie Pro's windows?

Select Send To Back from the Window menu to send the frontmost window behind all the others.

Did you know that...

...you can examine the history of your transfers?

Select Show Log from the Window menu. You can repeat commands in your log by double clicking an entry in the log listing. Hold the control key down to modify them before they are executed.

Did you know that...

...you can modify how Anarchie Pro copies URLs?

When you copy a URL from a Listing Window, the Log Window or anywhere else in Anarchie Pro it is automatically formatted to 72 columns and angle brackets are put around the text. Hold the option key down while you copy out the URL and Anarchie Pro will not add the angle brackets or format the text for 72 columns.

Did you know that...

...you can see what is really happening during a transfer?

Select Show Transcript from the Window menu.

This window is helpful for working out what is going wrong when a transfer fails. You can Command-click URLs in the transcript window to retrieve files or open links.

Did you know that...

...you can put multiple bookmarks in one file?

Choose List Bookmarks from the Search menu. Select multiple items using the Shift or Command keys, and then choose Save Bookmark... from the File menu.

Did you know that...

...you can do pattern matching in the Get via FTP window?

You can put patterns in the Path and Anarchie Pro will only display files whose path and filename match that pattern. For instance, if you put:

j

then only files with a j in them will be displayed in the resulting file listing.

Did you know that...

...you don't need to fill in a username when you are doing anonymous FTP?

Anarchie Pro will automatically fill in the username as anonymous and use the email address you have configured in Internet Config. You only need to fill in the username and password when you are not using anonymous FTP.

Did you know that...

...you can make bookmarks with a username in them?

Connect using your username and password and choose Save Bookmark... from the File menu. The Username is then stored in the bookmark. Anarchie Pro will ask you to confirm saving the password.

Did you know that...

...you can add a password to a bookmark?

Connect to a site using the correct username and password, then save a bookmark at that site. Open the bookmark in a text editor like BBEdit and enter the password between the : and the @ characters. Save the bookmark.

Warning: Your password is now visible in plain text to anyone who opens that file! Be careful who has access to that bookmark!

Did you know that...

...you can automatically FTP to the Stairways FTP site?

Open the About box and click the FTP Server link. Or just click on this URL:

[<ftp://ftp.stairways.com/stairways/>](ftp://ftp.stairways.com/stairways/)

Did you know that...

...you can automate Anarchie Pro using AppleScript?

Anarchie Pro is both scriptable and recordable. Example scripts come with the Anarchie Pro distribution. The example scripts are also available on Anarchie Pro's Web pages.

Did you know that...

...Anarchie Pro can transfer files through firewalls?

Set your firewall preferences by selecting Firewalls... in the Settings menu, which opens Internet Config's Firewalls panel. You can now enter your firewall preferences. Note: This requires Internet Config 2.0

If you do not have Internet Config 2.0, click the URL below:

[<ftp://ftp.stairways.com/stairways/>](ftp://ftp.stairways.com/stairways/)

Did you know that...

...you can move files around on an FTP site?

Select the file you wish to move in a listing window, choose Rename... from the Remote menu, and enter the full path to the file and the (new) name for the file.

Did you know that...

...you can find out the transfer speed in bytes per hour?

During a download click the Bytes/Sec field and it cycles through:

- Bytes/Sec
- Bytes/Min
- Bytes/Hour

Did you know that...

...you can retrieve the latest list of Archie servers?

Select Update Server Lists from the Settings menu to make Anarchie Pro get the latest list of Archie, UMich and Info-Mac servers.

Did you know that...

...you can find out when your download is going to finish?

During a download click the Time Left field and it cycles through:

- Time Left
- Total
- Time
- Start
- Finish
