How to Register

Make a check or money order for \$ 14.95 payable to:

Angelica V. Chapman

Mail to:

Angelica V. Chapman
5508 E. 111th Drive
Thornton, CO 80233

Insert your Name and Address in the envelope, along with the disk size needed (5 1/4 or 3 1/2), and for the 5 1/4 the density size desired. (1.2 MB or 360 K). If you have a E-mail address or Web page, include the address or URL.

You will be sent a disk or it can be uploaded with the registered version with the additional features included.

Please Note!!! - do not delete the files or directory on the drive that the existing numerology program is on.

Online Addresses:

AOL - Angelfind@aol.com

A practicing numerologist since 1977 and she has done thousands of charts (manually). She developed the idea of a computer version of the numerology chart.

Numerology Lessons

You will receive 10 numerology lessons in the windows "Help" format (.HLP). These lessons will step you through the creation of a chart, as if you were manually creating it. The advantage is you learn how and why a chart is created and various interpretations. Angel Chapman is the author of the lessons and a Numerologist.

Years Page

Years Page

An additional page will be printed called the "Years Page". It will cover each year from birth to 84 years old, if you start with year "One", 83 years if you start with "Zero". It will give you the essences, personal number, universal number, and pinnacle for each year until 83/84 years old.

Ten Numerology Lessons are included when you register, to assist you in learning more about numerology. They are in a "HELP" (.HLP) file format, developed by Angel Chapman

This information requires a little bit of experience and an intuitive nature to interpret. The delineation for this page is included in the ten lessons. A special delineation, for an individual year, that you request is done and placed on the comments page. (This date would fall between the date of birth and 83 years of the subject: the program specifies those dates and you enter a date that is between those shown).

The use of a One or a Zero in starting off the years page is a choice given to you as the chart maker (Numerologist) to decide. It has stirred a controversy in some numerology circles for one or the other to be valid. Some merologist believe that Zero is the starting number because a life starts at birth, others believe that a person is in their first year, to them One is favored. As you work with the years page you may prefer one or the other, so both were included.
