

Graphic presentations 4

Chart series 4: Sales staff data

Loading time on Pentium 120MHz: 40 sec.

Possible problem:

If Word has problems updating the graphs4.doc and keeps showing a screen with the message: Re-establish automatic links? Or if it doesn't show this, but does not progress with updating the pages, try the following:

Alt-Tab: switches to Excel and the screen will show.

If this happens:

go to Excel, open the Tools menu, select Options, select the Edit tab sheet and UNCHECK the option: Ask to Update Automatic Links.

DELETE this paragraph once read or problem solved.

If you have Microsoft Excel, the 1 chart will be automatically updated when completing the table on **page 25** of the Analysis model. You may leave them in this separate file or cut/copy them into analysis.doc and paste them where you like.

If you do not have Microsoft Excel the charts cannot be calculated.

You may DELETE these two paragraphs!
