

INSTALLATION INSTRUCTIONS - TOMONITOR SOFTWARE

WHAT YOU SHOULD HAVE:

IF YOU DOWNLOADED THE TOMONITOR SOFTWARE ELECTRONICALLY

If you downloaded the TOMONITOR software electronically you will have a file called TAKOUT.EXE or TAKOUT.ZIP

Make a directory on your hard drive (usually C:) called TOMONITR, and copy the file TAKOUT into it. Move to that directory if necessary by typing CD \TOMONITR <enter>. Uncompress the file TAKOUT.EXE by typing
TAKOUT <enter>
or uncompress the file TAKOUT.ZIP file using PKUNZIP, or other utility.

IF YOU RECEIVED THE FILE ON A DISK:

The disk should contain a file called TAKOUT.EXE. Make a directory on your hard drive (usually C:) called TOMONITR, and move to that directory if necessary by typing CD \TOMONITR <enter>. Put the disk into your A: drive (or B:). Uncompress the file by typing A:\TAKOUT <enter>.

You will now have the following files in your TOMONITR directory.

READ_ME.1ST
READ_ME.BAT
INSTALL.BAT
VENDINFO.DIZ
FILE_ID.DIZ
VENDOR.DOC
REGISTER.PRN
SETUP.PRN
MANUAL.PRN
INSTALL.PRN
EQUIPMNT.PRN
VENDOR.TXT

TOMONITR.EXE
DEMODATA.EXE

SETUP.DAT

HCHEQUE.DBF
HPAYMNT.DBF
HDETAIL.DBF
CHEQUE.DBF
CHEQUE_N.DBF
CLIENT.DBF
CLIENT_N.DBF
DETAIL.DBF
ITEM.DBF

ITMSOLD.DBF
LOGINS.DBF
SETUPTM.DBF
PASSLOG.DBF
PAYMNT.DBF
SERVER.DBF
STATIONS.DBF
SUBMENUS.DBF
TABLE_NO.DBF
ORDERS.DBF
FORDERS.DBF
INVSETUP.DBF
DRIVER.DBF
GROUPS.DBF
DISCOUNT.DBF
TABLEDEX.DBF
REPORTS.DBF
PAYTYPE.DBF
ARC_LOG.DBF
DEPT.DBF
SCANCODE.DBF
PARAMS.DBF
CLIENT.DBT

CIT3540.DRV
ASCII.DRV
STAR300.DRV
HPLJII.DRV
CIT3530.DRV
EPSON.DRV
MONITOR.INI
LOAD.MEM
PAYSH.MEM
SUBSH.MEM
MNUH.MEM

START THE INSTALL:

Move to the directory on the hard drive where the TAKOUT files are located if necessary.

Type INSTALL <enter>

You will be asked if you wish to install demonstration data. If you have already installed the program, and have entered data which you do not wish to lose, choose "N".

You may instead type TOMONITR S C CH <enter>

This will start the program. The "S" parameter goes right into SETUP so that you can enter some of your company information. The "C" and "CH" parameters cause the program to create the necessary indices.

You may view or print the various information files, and the manual, by entering the program with the "MANUAL" parameter -

TOMONITR MANUAL

You will have an option to READ, PRINT, or SKIP the SETUP.PRN file. This file contains the instructions for initially setting up the system with your own information. WE RECOMMEND STRONGLY THAT YOU PRINT THIS FILE, AND HAVE IT ON HAND during setup. This information is duplicated in MANUAL.PRN. You will also have an option to read or print the manual.

When this option is finished, you have an option to READ, PRINT, or SKIP the REGISTRATION.PRN file. We suggest that you print it now for convenience, and make use of it should you decide that the software fits your needs and you wish to register it.

To run the program normally, for use, type

TOMONITR <enter>

Note that the sample data as supplied uses MGR as a server secret ID.

The program when installed contains sample data, so that you may investigate it quickly and easily. When it is time to "go live", run the program with the EMPTYDATA parameter:

TOMONITR EMPTYDATA <enter>

This will cause the program to replace the sample data with empty data, ready for you to enter your actual company information. Note that ALL DATA MUST BE RE-ENTERED.

WHY SHOULD YOU REGISTER?

This is a shareware version of TOMONITOR. It is limited to operation for 30 days after its first use, and then it will require reloading, and THE BLANK DATA REINSTALLED.

Upon registration, we will send you by mail the latest version (if there is one) of the software, and a comprehensive printed operation manual.

We will give you a code to key into your program which will allow you to use the TIMECLOCK, ACCOUNTS, MAGSTRIP and other features and will allow you to use the program with no time restriction. It will also remove the Shareware message on startup.

You will receive 30 days of free telephone support from date of first use at 905-388-9624.

SUPPORT AND SERVICES:

While you are evaluating the shareware product, you may receive 30 days of free telephone support at 905-388-9624. You must pay for the telephone call. You may also send questions and problems to CompuServe - 71426,1503, or email via the Internet to agorman@netaccess.on.ca .

Check our WWW web page for the latest version, utilities, and manuals and other useful information. The address is:

<http://netaccess.on.ca/~agorman> (Note the "~" !)

When the product has been registered, you may receive support by telephone/modem (which we recommend for larger users), and you have access to our services:

Installation of the menus and modifiers	\$ 100
Installation of the server list, payment types, etc.	50
DROFFICE.EXE - Office close software	100

RUNNING THE PROGRAM.

The program requires at least 2 mb extended RAM memory. The program will run without any memory management (HIMEM.SYS) being available in most instances. If error messages indicate that HIMEM.SYS is required, then the following line must be added to your CONFIG.SYS file, in your boot directory (usually C:\), if it (or one like it) is not already there:

```
DEVICE=C:\DOS\HIMEM.SYS
```

If it was necessary to add HIMEM to the CONFIG.SYS file, then the computer must be rebooted to cause it to take effect.
