

Directions for the Installation of EPA TUTOR v 2.0

1. Place the EPA TUTOR Disk into the disk drive.
2. At the systems prompt (ex. "C:\>") type: "A: INSTALL"
("A" being the drive into which the demo disk was placed..if placed into "B" drive type "B: INSTALL")
Please Note: EPATUTOR was written as a DOS program, but will function in Windows 3.1 and Windows 95. (Tested on these platforms with IBM 486)
3. The install program will automatically uncompress and install the program to the subdirectory "\ EPATUTOR". During the installation process, the program will allow you to change from the default destination sub-directory and allow you to choose any subdirectory of your choice.
4. During the installation, the program will also give you the option to print out all documentation and registration order form. It will also give you the option to read the documentation files at that time. It will also request your name or company name so that your software will be personalized with your name on the program menu. Simply type in up to 27 characters, and this will be placed at the top of the main menu.
Your program has also been personalized prior to shipping with your name in the introductory graphics opening. This was done prevent someone from "hacking" the program for their own purposes in the event it was lost in the mail or misplaced by you at any time.
5. If preferred, all documentation and registration form may be printed out after installation by typing the following:
For Documentation, Inside the subdirectory containing the program files, Type: "PRINTDOC" For the HARD COPY STUDY GUIDE order form, type : "ORDER"
6. Once your program has been installed on your hard drive, you it will automatically start. For future startup of the program, simple go to the program subdirectory at systems prompt, Dos mode, (Ex. at "C:\>" type "CD\EPATUTOR")...once in the program subdirectory (EX."C:\EPATUTOR") type "EPATUTOR", and your program will begin. Or in Windows mode select EPATUTOR.COM in the File Manager.
7. We feel the introductory graphics are nice to see,...but after a few start-ups, you may not want to go through the whole introduction again and again. To by-pass the Introduction, simply press the [ESC] escape key once the Intro begins. This will bypass the Intro, and go straight to the main program.

That's it! Throughout the program simply follow the on screen directions, and you may manuver to various choices by using the arrow keys. I hope you enjoy "EPA TUTOR".

Any comments or suggestions will be welcome and appreciated. Thank You for registering "EPA DEMO TUTOR v.2.0"

& GOOD LUCK WITH YOUR CERTIFICATION EXAM!
