History

Since the beginning of shepherd dog breeding in 1899, the breeding results were documented in yearly issues of the breed- and studbooks provided by the German Shepherd Dog Breeding Association. In addition there were all the catalogues of the main dog shows and the results of them in the magazines of the association. This means for dog lovers, in particular for dog breeders they have to cope with an incredible and enormous amount of information. If there is information available at all, it took you days and days to study all the sources one can think of in order to gather the information just needed.

Because of these problems the idea evolved to develop an information system for German Shepherds which is able to hold all information about a certain dog and is very user friendly at the same time; meaning that everybody - even a non trained PC-user can handle it. All data entered and stored once can be easily retrieved, maintained and printed by the simple click of a button.

So a system was developed over the time, which is now even more than the original idea.

The first steps were done with WINDOG's 1.0 © for German Shepherds which came on the market 1993, due to the comfortable design of all the screens and the simple handling of the system, this program started a triumphal procession reminding to the roman victories.

With the version WINDOG's 2.0 © a lot of added functionality and as well many modified features were available like five generation pedigrees, support for working trial results, additional printouts, display of brothers and sisters and a lot of additional selections etc. etc..

With the improvements of Version 2.1 it seems that WINDOG's © is the best dog information system currently available on the market

Edmund Meulendick & Jürgen Zimmermann

System Requirements

Before you can start working with WINDOG's 2.1 the very first time you have to install the program on your computer.

The Windows based installation program eases this work for you.

siehe auch:

[Minimum System Requirements](#)

Minimum System Requirements

For a successful execution of WINDOG's 2.1 the following hardware is required :

MS-DOS Operating system, Version 3.1 or higher
(recommended is MS-DOS 5.0 or higher)

Microsoft Windows, 3.0 or higher
(recommended is 3.1)

A PC with 486-DX processor or higher
(recommended is a 486/66 or 80 Prozessor)

Minimum 4 MB main memory
(recommended is 8 MB, or even better 12 or 16 MB)

15 MB free disc-space on your hard disk

3,5-Inch Disk drive (1,44 MB)

Microsoft Mouse

To print select from :

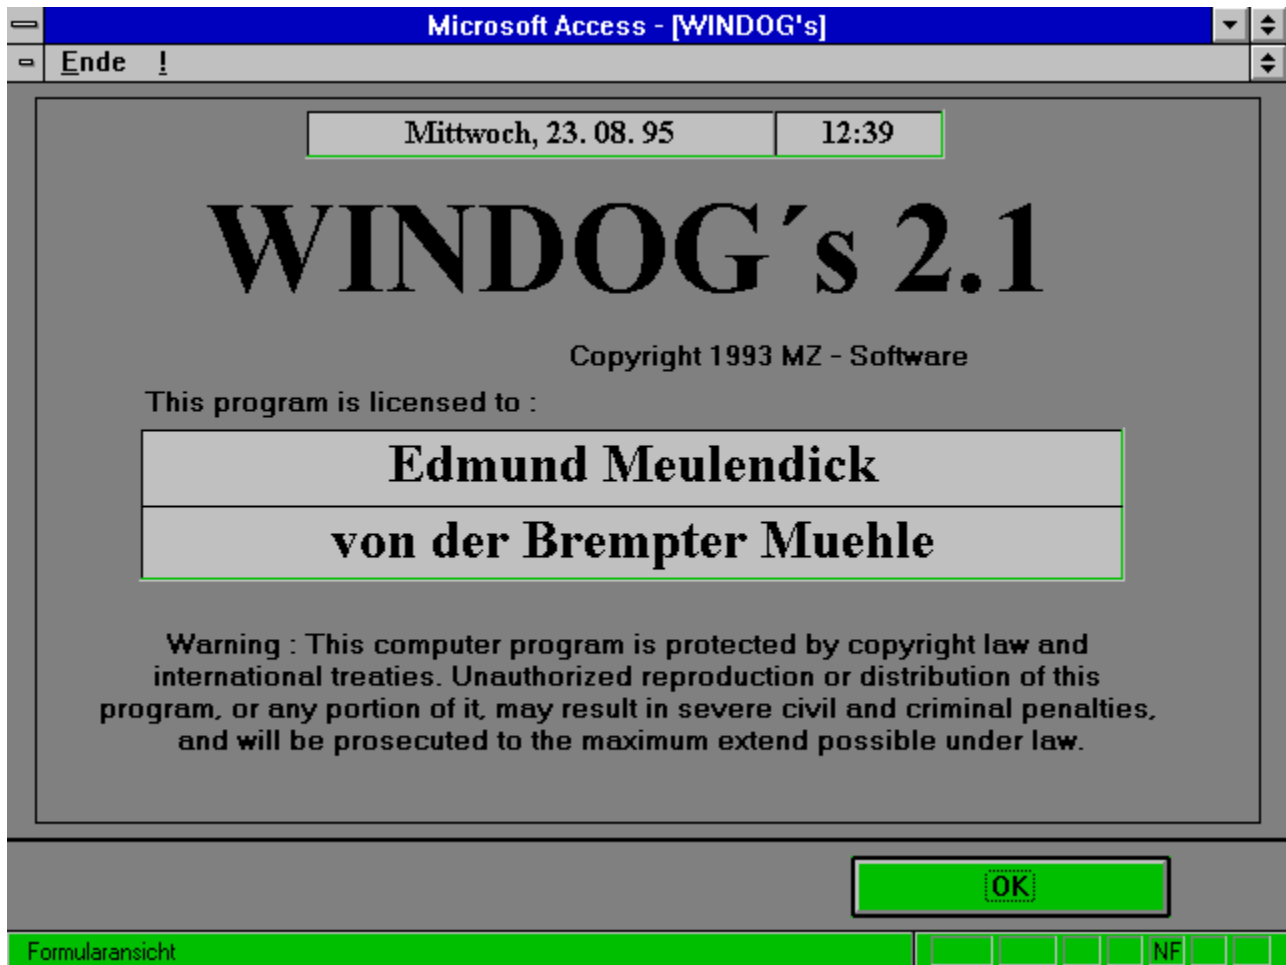

all printers, supported by Microsoft Windows,
Version 3.0 or 3.1.

Useful add on components

More main memory for better performance

256-colour graphics adapter (or higher) for better pictures onscreen

Welcome Screen

This screen will be always shown first when you start the program. Clicking on 'OK' takes you to the main menu.

Find Male

Click on the little button on the righthand side of the field to open the pull down menu in which you can scroll through or speed up the search by typing the starting letters of the desired dog.

As soon as you type the first character the list will scroll according to it in alphabetical order.

If the name of the dog is highlighted just hit the ENTER key or you can select it with a mouse click.

If you can not find the desired dog it is either written in another way or it is not in the database. A new dog can be added with function 'New Dog'.

Find Bitch

Click on the little button on the righthand side of the field to open the pull down menu in which you can scroll through or speed up the search by typing the starting letters of the desired dog

As soon as you type the first character the list will scroll according to it in alphabetical order.

If the name of the dog is highlighted just hit the ENTER key or you can select it with a mouse click.

If you can not find the desired dog it is either written in another way or it is not in the database. A new dog can be added with function 'New Dog'.

Here the breed survey report of the selected dog is shown

Picture

If there is no picture for the current dog in the database the button 'Add Picture' is visible, if a picture is available the button changes to 'Show Picture'.

Click on the button and the picture will be displayed.

The program enables you to add picture packages you ordered from MZ-Software ('Utilities'/'Updates from MZ-Software) or to add single pictures with the 'Add Pictures' function.

siehe auch:

Insert Picture

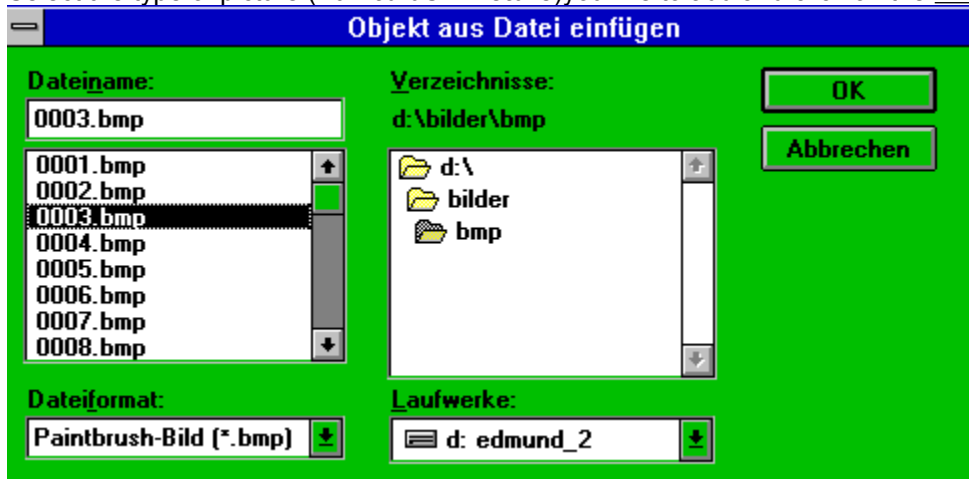

Insert Picture

With this function you can add your own pictures.

Select the type of picture (**Paintbrush Picture**) you like to add and click on the **File** button.

Select the picture you like to add for the current dog and click on OK.

The picture will be added to your picture database.

You can use most of the popular graphic formats. But keep in mind that the size of the picture will not be reduced while it is added.

The following format we found the most appropriate:

Format : BMP 256 Colours 3cm high

Close takes you back to the dog information screen.

Change dog information

If you want to change the information of a dog or add information to it, click on the button **Change dog info**. Now the screen changes that you can edit all fields except the name of the dog. If you want to add or change the owner, breeder, possessor, sire or dam please click the corresponding '**Attach**' button.

New Dog

This allows you to add new dogs by yourself.

The button **New Dog** takes you to a screen similar to the dog information, but you are able to add a new dog to your system including all relevant data.

After you entered the name of the dog you can use the **TAB-Key** to get to the next field or you can use the mouse to select the next field.

Assign sire or dam to the new dog, by pushing the button Attach Parents. Now you can choose sire or dam from the pull down menus as described before. After selecting sire or dam they are directly assigned to the dog you entered and you also earn their pedigrees as far as they are in the system.

Check Doubles

If you see this hint from the **Check Doubles** function, you tried to enter a dog which is already in the database. If you tried already to find it, go to the Change Display function (Main Menu / Utilities) and change display of this dog 'Yes'.

Enter Sire

Reg. Office	Reg. No.	Working title	ZB
SZ		?	?

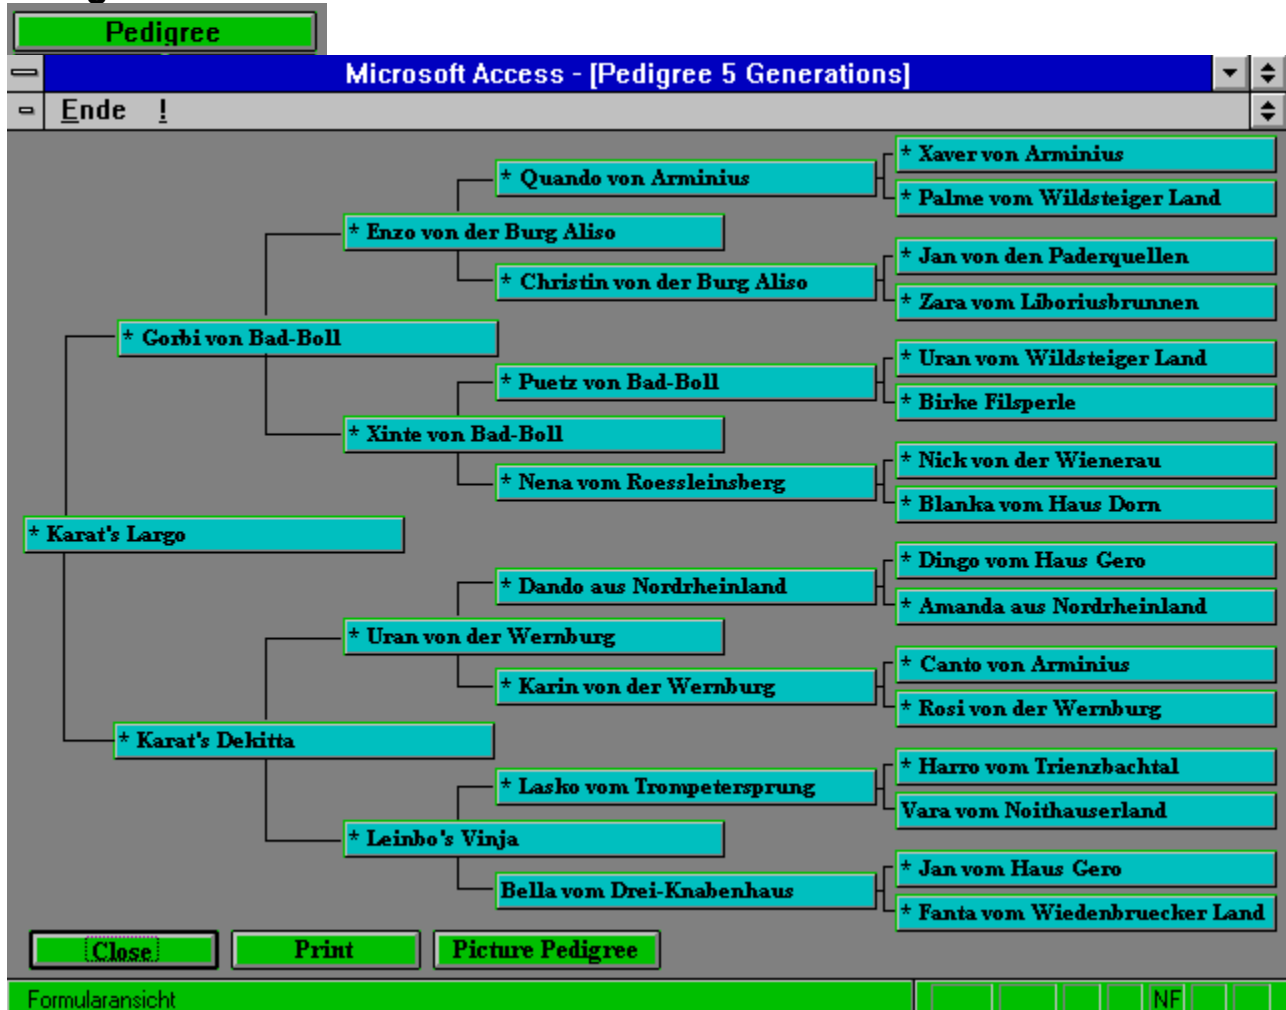

If you can not find the sire you are looking for with the attach parents function here you can add a new sire directly. After you entered the new sire simply click the Close button and the new sire will be automatically attached to the current dog.

Enter Dam

The image shows a software dialog box titled "Enter Dam". The main window has a blue title bar that says "Enter New Dam". Inside the window, there is a "Name" label above a text input field. Below this, there are four columns of labels: "Reg. Office", "Reg. No.", "Working title", and "ZB". Each label has a corresponding input field below it. The "Reg. Office" field contains the text "SZ". The "Working title" field contains a question mark "?". The "ZB" field also contains a question mark "?". At the bottom center of the dialog is a green button labeled "Close".

If you can not find the dam you are looking for with the attach parents function here you can add a new sire directly. After you entered the new dam simply click the Close button and the new sire will be automatically attached to the current dog.

Pedigree

After you clicked on the **Pedigree** button, the pedigree of the current dog will be generated and shown on the 5 generation pedigree screen. If you now point on one of the names of the ancestors an information screen will show you further data about the selected ancestor. Close takes you back to the pedigree screen.

Select dogs

Also you have the possibility to transfer selected dogs into your main dog database.

After clicking on the **Select dogs** button you will be asked to enter the year and class (e.g. 1994 and GHKLR).

The first dialog box is titled "Eingabe der Parameterwerte" and contains the text "Bitte wählen Sie das Jahr aus" above an empty text input field. Below the field are two buttons: "OK" and "Abbrechen".

The second dialog box is also titled "Eingabe der Parameterwerte" and contains the text "Bitte wählen Sie die Klasse aus" above a text input field containing the value "GHKLR". Below the field are two buttons: "OK" and "Abbrechen".

Click on OK and you see the following screen.

The screenshot shows a Microsoft Access window titled "Microsoft Access - [Transfer HZS Information]". The window contains a form with the following elements:

- Buttons: "Main Dog Show - Participants", "1993", "GHKLR", "ALL", "NONE", "START".
- Table with columns: ZB, Place, Catalogue No., Name of the dog, Reg. No., Transfer.
- Footer text: "Click the radio buttons to transfer the dogs and results to the main database or select 'ALL', then 'START'".
- Close button: "Close".

	ZB	Place	Catalogue No.	Name of the dog	Reg. No.	Transfer
Dog:	VA	1	1067	Jeck vom Noricum	1705812	<input checked="" type="radio"/> Nein
Dog:	VA	2	1124	Atlas von Bad-Boll	1742880	<input type="radio"/> Nein
Dog:	VA	3	1050	Hoss vom Hasenborn	1753395	<input type="radio"/> Nein
Dog:	VA	4	1161	Kimon van Dan Alhedy's Hoeve	1788156	<input type="radio"/> Nein
Dog:	VA	5	1111	Watz vom Schornfels	1740826	<input type="radio"/> Nein
Dog:	VA	6	1254	Ulk von Arlett	1769704	<input type="radio"/> Nein
Dog:	VA	7	1123	Ajax vom Haller Osning	1738542	<input type="radio"/> Nein
Dog:	VA	8	1100	Nero vom Hirschel	1783907	<input type="radio"/> Nein
Dog:	VA	9	1061	Cash vom Wildsteiger Land	1793773	<input type="radio"/> Nein
Dog:	V	1	1090	Cim vom Ecknachtal	1743411	<input type="radio"/> Nein
Dog:	V	2	1150	Apoll vom Laacher-Haus	1780076	<input type="radio"/> Nein
Dog:	V	3	1069	Amigo vom Belgier	1770906	<input type="radio"/> Nein
Dog:	V	4	1273	Natz von der Eimerau	1806910	<input type="radio"/> Nein

Now you can select all dogs of this class (click on **ALL**) or you can mark each single dog you want to transfer. To mark single dogs you have to click on the little circle on the right side of each dog (then it changes from No to Yes). Now you can start to transfer the dogs and the additional information to your main database, to do so click **START**.

With the button **NONE** you can you can undo your selection.

Of course you can copy the selected records to the clipboard by using the copy function from the pull down menu.

Print HZS list !

After clicking on the **Print HZS list** button you will be asked to enter the year and class (e.g. 1994 and GHKLR). Click on OK and the list will be printed.

VA Dogs

Clicking on this button you will be asked for the year of which the list should be. The list will show all VA dogs (Pick of the best) of the desired. When the list is displayed you can use the **Print** button to get a paper printout.

Of course you can copy the selected records to the clipboard by using the copy function from the pull down menu.

Selections Overview

Selections Dog Database

Select the information with predefined searchcriteria like sire, dam, owner, breeder, hip dysplasia, ZB or kennelname (An '*' can be used in various combinations)
e.g.
With 'Arminius' in the kennelname field you would select all dogs from the this kennel.
Combined with other searchcriteria the resulting set of dogs will be as detailed as you like it.

Selections Working Trial

Select the information with predefined searchcriteria like year, points in part A;B or C, sire, dam, owner, breeder or kennelname (An '*' can be used in various combinations),
e.g.
With 'Karthago' in the kennelname field you would select all dogs from this kennel which were shown at the BSP.
Combined with year and/or points, the result will be more exact.
or with owner name = 'Mueller',
result : All dogs on the BSP where the owner is called Mueller.

Selections Main Dog Show

Select the information with predefined searchcriteria like year, breed survey, sire, dam, owner, breeder or kennelname, (An '*' can be used in various combinations)
e.g.
With 'Wienerau' in the kennelname field you would select all dogs from this kennel which were shown at the HZS.
Combined with year and/or class the result will be more exact.
or
owner name = 'Mueller',
firstname = 'Hans'
result : All dogs at the HZS where the owner is called Hans Mueller.

With the [Kennel Administration](#) you are able to maintain all puppies of your kennel. The Puppy overview gives you an detailed overview of the puppy you selected from the pull down fields **Find male** or **Find Female**.

[siehe auch:](#)

[Find male](#)

[Find female](#)

[Selection](#)

[Print puppy lists](#)

Find male

Open this field with a mouse click and select your puppy by the first name.

The screenshot shows a web interface with a grey background. At the top, there are three links: 'ide', 'Kopieren', and 'Info'. Below them is the title 'Find male !'. There is a search input field with a green dropdown arrow on the right. A dropdown menu is open, showing a list of names, with 'Brix' highlighted in a light blue box. Below the dropdown, the text 'me: Brix' is visible. At the bottom, there are three input fields: a blue one with 'SZ', a yellow one with '123456', and a grey one with 'Date of bir'.

As soon as you type the first character the list will scroll according to it in alphabetical order.

If the name of the dog is highlighted just hit the ENTER key or you can select it with a mouse click.

Find female

Open this field with a mouse click and select your puppy by the first name.

The screenshot shows a search interface with a grey background. At the top, the text "Find female !" is displayed. Below it is a search input field with a green arrow icon on the right. A dropdown menu is open, showing the name "Biggi" highlighted in cyan. At the bottom of the interface, there is a label "AKZ:" followed by a cyan input field containing a question mark.

As soon as you type the first character the list will scroll according to it in alphabetical order.

If the name of the dog is highlighted just hit the ENTER key or you can select it with a mouse click.

Selection

Selection :

with show rating : 

with working title : 

with breed survey : 

Here you can select your puppies by different criteria (whether they have a show rating, working title or breed survey).

Print puppy lists

Print :	Puppy list :	<input type="button" value="Print"/>
	with show rating :	<input type="button" value="Print"/>
	with working title :	<input type="button" value="Print"/>
	with breed survey :	<input type="button" value="Print"/>

Of course you can also print lists of your puppies. Available lists are; Puppies with show rating, working title or breed survey and a complete list of all your puppies.

Change Puppy data

Clicking on the **Change Puppy data** button you can change or add data of a puppy you already entered. Puppy names you mistyped can be changed as well, the system takes care that you do not use a first name twice. The button **Puppy overview** closes the change data screen.

For the meaning of the different fields please refer to the puppy overview description.

Pedigree

Of course you can look at the pedigree of the current puppy, the functionality on the pedigree screen is equivalent to the one in the Dog Management

Brothers and Sisters

Clicking on this button shows you all brothers and sisters of the current puppy.

Attach Parents

If you want to add or change sire or dam please click the '**Attach Parents**' button. Two pull down fields will appear on the screen where you can search for the names.

Attach Owner

If you want to add or change the owner please click the corresponding '**Attach Owner**' button. A pull down field will appear on the screen where you can search for the person.

Add Puppy

With **Add Puppy** you can enter new puppies to your kennel (in the name field **only enter the first name**). Add all other information like date of birth, tattoo or sex.

Enter Sire

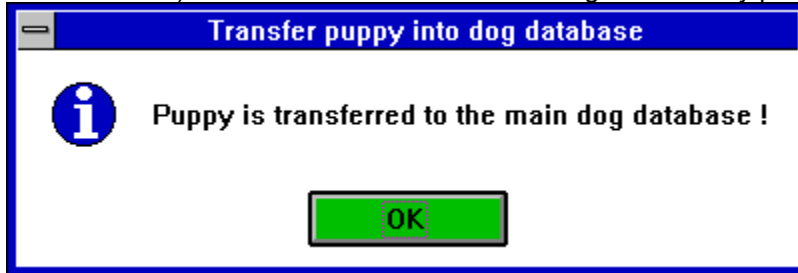

If you can not find the sire you are looking for using the Attach Parents function here you can add it directly with Enter Sire. After you entered the new sire simply click the Close button and the new sire will be automatically attached to your puppy.

Enter Dam

If you can not find the dam you are looking for using the Attach Parents function here you can add it directly with Enter Dam. After you entered the new sire simply click the Close button and the new sire will be automatically attached to your puppy.

Transfer Puppy entry

A puppy which is old enough and of which you think it should be in the main dog database (e.g. as your own stud bitch) can be transferred to the main dog database by pushing the button **Transfer Puppy**.

The puppy is still available in the [kennel administration](#) and all functionality except the puppy sales contract as well (use the [General Sales Contract](#) under Utilities).

Sales Contract

With this button you can print a sales contract for the current puppy. Please take care that the new owner is already assigned to your puppy, his data will be entered into the contract as buyer. After you activated this function you will be asked for the price and also for the price in words.

Change Display

Using the Change Display you can decrease the number of dogs displayed in the pull down bars on the Dog Information screen. If you try to add a dog which is already in the system but display is set to no the program gives you the information that you tried to enter a dog twice.

Change sales contract

Here you can add or change your own address and the free text for the Puppy sales contract and the general sales contract..

Print general sales contract

Here you can print a sales contract for all dogs in the main dog database. On the screen you will see next you select a dog from the pull down bar afterwards you will be asked to enter the price and the price in words.

Delete person records

Here you can select a person from the pull down bar on the top of the screen but only persons are available who are not owner of a dog. If you want to delete a person who is not in the list, first remove all ownership's in the dog information or puppy overview screens.

Delete dog records

Here you can select a dog from the pull down bar on the top of the screen. But only dogs are available which are not sire or dam of another dog's pedigree.

Delete pictures

Here you can delete pictures you do not need anymore.

Update from MZ - Software

With this function you are able to update your system with dogs, pictures, HZS and BSP data delivered by MZ - Software.

Microsoft Access - [UPDATE]

Backup Data

With this function you can backup the information which is in the main dog database. You should do a backup whenever you added or changed a number of dogs or information related to them.

Restore Data

With Restore Data you can restore the status you saved last time with Backup Data.

Add dog to puppy list

If you have bought the kennel administration option it might be possible that one or more of your dogs is already in main dog database. As the system does not allow duplicate names you can not enter this dog as a puppy but do not need to delete the dog. Using this function you are able to add dogs with your kennel name to your kennel administration. From the pull down bar you can select a dog with your kennel name afterwards you need to enter the first name and you can also enter the tattoo. If you click on **Add to kennel** the dog will be available in the kennel administration.

Print order form

This function prints a form you can use to fax or mail for additional dogs, pictures etc. or to order WINDOG's for a friend.

This function allows you to look at and print pictures of your database, which either obtained from MZ-Software or scanned yourself.

Kennel Administration

Function to administrate the breed of your own kennel. The system takes care that a first name is not used twice. You can also select and print lists of your puppies also you can print sales contracts for your puppies.

Race independent Version

This version of WINDOG's allows you to maintain almost all races. It is not specific for a certain race but very flexible so that the functionality is almost the same or can be justified to your needs. No dogs or other data is provided with this version.
