

# Dream Stripper Game Options

## Shadows

This option allows you to turn on or off shadows in the game. If you shut off this option it will help with your frame rate, , but you will lose detail.

## Stripper Receives Shadows

This option allows you to turn on or off how the model in the game receives shadows. If you shut off this option it will help with your frame rate, , but you will lose detail.

## Force Transform and Lighting

This option allows forces you to use the transform and lightning shader. If you turn on this option it will help with your frame rate, but you will lose detail.

## Disable MultiTask Loading

If you are having problems with the game loading, turn this option on.

**Random Dancing**

This allows the dancer to start dancing randomly, when there is no user input. This works both in game mode and total control mode. (In the Demo this option is always on).

**Random Dance Time**

This is the time before no user input causes the dance to start dancing her random routine.

**Shadow Detail**

This option sets the shadow detail.

**MP3 Music Detail**

This option allows you to add in your own MP3 Music files to play during the game. There is a max limit of 100 music files. Double click on a file name to remove it from the list.

**Random Play List**

This sets the random play list option on or off.

**Email Log file**

This option emails the game log file to Ensign Games.
