

Winsearch - Shareware

Winsearch is a filefinder for Windows 3.1/3.11

How to install Winsearch 3.0

Just run setup.exe and Winsearch will be installed to you harddisk. If you get an error message concerning the copying of the commdlg.dll then just ignore. You may already have this file in your Windows-System-Directory.

To run this utility you need the following files:

Wsearch.exe	In a directory of your choice
Vbrun300.dll*	In your Windows\system Directory
Threed.vbx	In your Windows\system Directory
Cmdialog.vbx	In your Windows\system Directory
CommDlg.dll	In your Windows\system Directory

* Vbrun300.dll is not distributed with Winsearch; it is available in more or less every Mailbox and on Compu-serve.

How to install Winsearch 3.0

Just run setup.exe and Winsearch will be installed to you harddisk. If you get an error message concerning the copying of the commdlg.dll then just ignore. You may already have this file in your Windows-System-Directory.

Registration

Please send \$15 or 20 Swiss Francs to:

John Lengacher
Burghaldenstrasse 31
CH-3653 Oberhofen / Switzerland

or GO SWREG on CompuServe
Registration ID: 4557

and you will get a password eliminating the shareware-reminder and allowing you to use all functions.

Comments

Any comments or suggestions are welcome. Please send them to the above address or CompuServe ID 100326, 2050

How it works:

Find a file

- Normal search

Just enter a search pattern (e.g. win*.*) and click on "Search"

- Filename contains

Enter a search pattern, e.g. "bat" and click on "Search" and files like : autoexec.bat, batman.txt and so on will be found

Launch or start a found file

Double-click on the file

Select one or more found files

- To select one file just click on it
- To select several files in a row: click on the first one and while pressing the „shift“-key click on the last one
- To select several files not in a row: click on the files while pressing the „ctrl“-key.

Copy, delete, rename, move or edit a found file

- select the file and drag it (hold mouse button down) to the required action button and drop it.

or

- select the file and click on the button for the required action

To drag more than one file keep the „shift“- or „ctrl“-key pressed.

Known Problems

If you use more than 256 screen-colors the dragicon may not display correctly.

Version 3.0 a fixes the problem that the safety box remains in the

memory when leaving Winsearch.
