1.3 Datastore Help: How To Use Help

How To Use Help You can receive help in several ways: \textdegree{} Help key - Press the Help key to see the Help contents. \textdegree{} Help menu - Choose one of the topics from the Help menu. - To receive Help with a menu \textdegree{} Menu Help or menu command, hold down the Right Mouse key over the menu or menu command and press the Help key. Help Commands Choose the Contents command from the Help menu to display the Table of Contents. Choose "How Do I...?" command to display a list of explanatory functions (for example, Create a new document, Change the colour of text). Choose Index command to display all Datastore menu commands.

1.4 Datastore Help: Getting Technical Support

Getting Technical Support

Before contacting the Digita Technical Support, please read the Troubleshooting section.

To contact Digita Technical Support in the UK:

Call: 0891 616 944 weekdays from 11am to 5pm. Calls are charged at 36p per minute cheap rate and 48p per minutes at all other times. Be sure to ask the permission of the telephone owner before calling.

Fax: 01 395 268 893.

Write: Datastore Technical Support Department Digita International Limited Black Horse House

```
Exmouth
       Devon EX8 1JL
CIX:
       digita@cix
       Conferences - 'digita' for general chat
                   - 'digita.tech' for technical
                     support. Mail 'digita@cix'
                     for access to this closed
                     conference.
       100031,3032 (or 100031.3032@compuserve.com)
CIS:
If you are outside the UK, contact your local
Digita representative.
When phoning, please have ready the following
1 Datastore version number (Refer About command,
 Project menu)
2 Description of your computer system
3 Detailed description of your problem
When writing, please provide the following
1 A stamped addressed padded envelope when
  enclosing disks for replacing or testing.
2 Datastore version number (Refer About command,
  Project menu)
3 Description of your computer system
4 Detailed description of your problem, with
  example files and/or printouts.
IMPORTANT
```

```
Unfortunately, under no circumstances can Digita
provide either telephone or written support to
unregistered users.
```

1.5 Datastore Help: What's New In 1.0?

What's New In 1.0?

As this is version 1.0 of Datastore, there is nothing new.

However, if you have any ideas or suggestions of new features or improvements that you would like to see in the next version then please let us know at the Digita technical support address.

1.6 Datastore Help: How Do I...?

How Do I...?

А Add a field Add a record В Browse through records С Change the attributes of a field Change the attributes of the text Change the attributes of a box Change the attributes of a picture Change the fonts used in requesters Change the screen mode Change the visual size of a record Create a database Create a field Create some text Close a database file Create a report Create a subset of records D Delete a box Delete a picture Delete a field Delete a record Delete text Design a database Draw a box Е Erase a record Erase text Erase a field Export data for use in other applications F Find a particular record G Get technical support on Datastore Go to a record Η Hide all of the pictures in the database Τ Import data from Superbase or other applications Insert a box onto the design of a record Insert a field onto the design of a record Insert a picture onto the design of a record Insert a record Insert text onto the design of a record J

```
Jump to a record
0
Open a database file
Open a Superbase file
Open a Digita Mailshot file
Ρ
Password protect my files
Print a report
Purge memory
0
Quit the program
R
Regain memory, when it is running low
S
Save a database file
Save a file under a different name
Save data for use with a different application
See the design tools
See the Video style record controls
Set up my printer
Solve a problem myself
Sort records
Т
Turn the toolbar off
U
Use a template
Use data from a different application
Use Datastore requesters
                Use help
                Use the gadgets in a requester
```

1.7 Datastore Help: Keyboard Shortcuts

Keyboard Shortcuts

Keyboard shortcuts are used to speed up your productivity with Datastore by providing keyboard alternatives to using the mouse.
