KITCHEN COLLECTION

Made to be enjoyed, made to be admired and above all made to last.

Today, a well designed, quality built and professionally fitted kitchen will enhance the beauty of your home, increase the value of the property and be the envy of your friends.

With a wide choice of styles and finishes to complement your home, The William Ball Collection presents to you all that is best in contemporary and traditional kitchens. Many unique features and finishing touches provide tempting design possibilities to create a room to be proud of.

The William Ball Collection of kitchens is designed to fit any size of room and can be personalised to suit your lifestyle. Colour co-ordinated cabinets ensure the installation looks good, not just on the outside but the inside as well. A comprehensive range of accessories provides the opportunity to create an individual kitchen by mixing and matching to suit individual taste.

Manufactured using only quality materials, the most advanced precision machinery and highly experienced craftsmen, a William Ball kitchen will serve you well for many years to come.

With the need to protect resources and the environment, timber is only taken from areas where a programme of replanting is carried out. Natural material such as timber does however vary in grain and colour with occasional knots appearing in some species. These variations add interest and beauty to a kitchen and make it quite distinctive from man made material.

If colour and grain uniformity are required, we would recommend that you consider choosing from our melamine or vinyl ranges within this brochure.

Choose a kitchen from The William Ball Collection and rest assured that you have chosen wisely.
