

"YAMS!" is short for "Yet another Minesweeper", and is a further version of the "Minesweeper" program supplied with Microsoft Windows 3.1. This version was developed because I did not like any of the other versions that I had for the Macintosh.

Please read the chapter "Important Information".

YAMS! 1.0 was programmed by:

Heinrich Schnermann
Wichmannstraße 26, 3000 Hannover 81, Germany
