

File

This menu has items which will allow you to start a new game or quit the program.

Counting

This menu contains items which provide an introduction into the fundamentals of card counting. It shows the probability the next card drawn will push you over 21 (going 'bust'), tables charting the best play given every possible dealer/player combination, and a window with the count of every card that has been drawn from the shoe.

Temptation

This menu contains the 'cheat' features that make the game so entertaining. You can see the next card, the dealer's down card, or see (and print) the whole shoe!

Special

The user 'Preferences' are accessible here. Also, a window displays the 1st 100 shareware supporters of this product.
