Cervical cancer : January 1993 through March 1996 :
926 citations / prepared by Lori J. Klein, Edward L.
Trimble. -- Bethesda, Md. (8600 Rockville Pike, Bethesda
20894) : U.S. Dept. of Health and Human Services, Public
Health Service, National Institutes of Health, National
Library of Medicine, Reference Section ; Pittsburgh, PA :
Sold by the Supt. of Docs., U.S. G.P.O., 1996.
-- (Current bibliographies in medicine ; 96-1)

Prepared in support of the National Institutes of Health
Consensus Development Conference on Cervical Cancer, held in
Bethesda, Md., April 1-3, 1996.

1. Cervix Neoplasms - bibliography I. Trimble, Edward L.
- II. National Library of Medicine (U.S.). Reference Section
- III. National Institutes of Health Consensus Development
Conference on Cervical Cancer (1996 : Bethesda, Md.) IV.
Title V. Series

02NLM: ZW 1 N272 no.96-1

SERIES NOTE

Current Bibliographies in Medicine (CBM) is a continuation in part of the National Library of Medicine's Literature Search Series, which ceased in 1987 with No. 87-15. In 1989 it also subsumed the *Specialized Bibliography Series*. Each bibliography in the new series covers a distinct subject area of biomedicine and is intended to fulfill a current awareness function. Citations are usually derived from searching a variety of online databases. NLM databases utilized include MEDLINE®, AVLNE®, BIOETHICSLINE®, CANCERLIT®, CATLINE®, HEALTH, POPLINE™ and TOXLINE®. The only criterion for the inclusion of a particular published work is its relevance to the topic being presented; the format, ownership, or location of the material is not considered.

Comments and suggestions on this series may be addressed to:

Karen Patrias, Editor

Internet: patrias@nlm.nih.gov

Ordering Information:

Current Bibliographies in Medicine is sold by the Superintendent of Documents, U.S. Government Printing Office, P.O. 371954, Pittsburgh, PA 15250-7954. To order the entire CBM series for calendar year 1996 (approximately 10 bibliographies), send \$47.00 (\$58.75 foreign) to the Superintendent of Documents citing GPO List ID: CBM96. For your convenience an order blank is given inside the back cover. Orders for individual bibliographies in the series (\$5.50, \$6.88 foreign) should be sent to the Superintendent of Documents citing the title, CBM number, and the GPO List ID given above.

Internet Access:

The *Current Bibliographies in Medicine* series is also available at no cost to anyone with Internet access through FTP (File Transfer Protocol). FTP to [nlmpubs.nlm.nih.gov](ftp://nlmpubs.nlm.nih.gov) and login as anonymous. The index file in the "bibs" directory provides information on the bibliographies available.

*Use of funds for printing this periodical has been approved by the Director
of the Office of Management and Budget through September 30, 1996.*

CERVICAL CANCER

The introduction of the Papanicolaou (Pap) test fifty years ago has led to a steep decline in deaths from cervical cancer. Nonetheless, this form of cancer accounts for 65% of all malignancies in American women and 5,000 cancer deaths in the United States each year. Worldwide, cervical cancer remains the leading cause of cancer deaths among women.

This bibliography was prepared for the National Institutes of Health Consensus Development Conference on Cervical Cancer held in Bethesda, MD on April 1-3, 1996. The conference focused on treatment and quality-of-life issues for women with cervical cancer. For women with early-stage disease, these include pretreatment imaging, the role of lymph node resection, primary surgery and radiotherapy, and adjuvant treatment. For women with advanced-stage disease, critical issues include optimal radiotherapy techniques, neoadjuvant and concomitant chemotherapy, pelvic exenteration, and palliative treatment.

Many unanswered questions remain as to how best to treat women with preinvasive disease of the cervix. Although the issues were reviewed at the Consensus Conference, the main focus of the Conference was cervical cancer. The bibliography, therefore, concentrates on treatment issues in invasive disease. Included are journal articles, conference proceedings and papers, and dissertations from 1993 through early 1996 related to the subject matter. The bibliography has been organized along the same lines as the conference, with the first small section dealing with improving and strengthening efforts to prevent cervical cancer. The next sections cover the management of early-stage disease, then advanced-stage and recurrent cervical cancer. The last section includes references to new directions in research. Most references are included only under a single category.

The compilers wish to thank Adam Glazer, National Library of Medicine, for his production assistance.

SEARCH STRATEGY

A variety of online databases are usually searched in preparing bibliographies in the CBM series. To assist you in updating or otherwise manipulating the material in this search, the strategy used for the NLM's MEDLINE database is given below. Please note that the search strategies presented here differ from individual demand searches in that they are generally broadly formulated and irrelevant citations edited out prior to printing.

SS 1 = CERVIX NEOPLASMS AND THERAPY& (PX)

SS 2 = *CERVIX NEOPLASMS

SS 3 = (TW) CERVIX OR CERVICAL

SS 4 = NEOPLASMS (PX)

SS 5 = (TW) ALL INVAD: OR ALL INVAS: OR STAGE OR STAGING OR STAGES OR FIGO

SS 6 = 3 AND 4 AND 5

SS 7 = CERVICAL INTRAEPITHELIAL NEOPLASIA OR CERVIX DYSPLASIA OR PRECANCEROUS CONDITIONS OR EXP THYROID NEOPLASMS

SS 8 = 6 AND NOT 7

SS 9 = 1 OR 2 OR 8

SS 10 = 9 AND HUMAN

GRATEFUL MED® and INTERNET GRATEFUL MED®

To make online searching easier and more efficient, the Library offers GRATEFUL MED, microcomputer-based software that provides a user-friendly interface to most NLM databases. This software was specifically developed for health professionals and features multiple choice menus and "fill in the blank" screens for easy search preparation. GRATEFUL MED runs on an IBM PC (or IBM-compatible) with DOS 2.0 or a Macintosh, and requires a Hayes (or Hayes-compatible) modem. It may be purchased from the National Technical Information Service in Springfield, Virginia, for \$29.95 (plus \$3.00 per order for shipping). For your convenience, an order blank has been enclosed at the back of this bibliography.

INTERNET GRATEFUL MED is available from the World Wide Web. The user with Internet access and an NLM user account need only point a compatible Web browser

(Netscape Navigator is strongly recommended) to <http://www.igm.nlm.nih.gov>. No other software at the user end is required. At present, MEDLINE is the only NLM database available through INTERNET GRATEFUL MED, but the Library expects to add access to other files rapidly.

SAMPLE CITATIONS

Citations in this bibliographic series are formatted according to the rules established for *Index Medicus*®*. Sample journal and monograph citations appear below. For journal articles written in a foreign language, the English translation of the title is placed in brackets; for monographs, the title is given in the original language. In both cases the language of publication is shown by a three letter abbreviation appearing at the end of the citation.
