

Sheet1

The first set of Macros illustrates a method to eliminate the restriction on the number of Macros in a worksheet. By activating the first Macro Alt-N a macro may have a name instead of a letter. This will work with any Macro.

This macro replaces the backslash for underlining. It also has the feature of making long columns easier to read.

\U

UNDERLN

This Macro is for creating a Print menu and executes all of the necessary commands. It is presently set up for Epson printers, however, it can be easily modified for any printer.
