JDW Production - 'Programming and improvement meet here'

"A winner never quits and a quitter never wins..."-Unknown  
"It ain't perfect, but I'm not done yet!!!"-me

This help file is brief, but I have made the assumption that you have read the on disk documentation accompanying 123 Shell and know how to use Lotus 1-2-3 menus and understand basic operation of your PC.

THIS IS NOT PUBLIC DOMAIN SOFTWARE! It isn't FREEWARE(tm) either because thats already a trademark. I like to call it TRYWARE. You try it before you have to buy it. You pay for programming not awkward copy protection schemes or TV spots and magazine ADs. You are granted a limited license to use this program (in the DOCs). Read the DOCs carefully before using the program or you might be sorry, as they do contain very important information you should be aware of.

THIS program may be distributed ONLY in its unmodified and unabridged and in its complete form with its accompanying files, see 123SHELL.TXT.

Donations (suggested \$10) /Questions/Ideas etc. should be sent to:

E-Mail can be addressed to Joseph Wong on Aircomm RBBS-PC

Constructive criticism of the program or feedback is more than welcome. Take care, and enjoy the program...

Function Key List:

F1 - Lotus Help

F2 - Edit mode toggle

F5 - GOTO (cell)/(range name)

Hold down the gray key labeled Alt...then hit:

Z  
C  
A

GENERATING ASCII: Alt-G (pre-def macros), always use a 3-digit decimal number (sorry no hex). I.E. Range name? 007 for chr\$(7)...easy?

RETURNING TO SHELL: Consider if you want your work saved or not before attempting to return...

SAVING: If creating a new worksheet with the pre-defined stuff... Don't use Alt-S...that's gooney...you have to use the regular file save 1st! That's just so 1-2-3 knows what filename you want to use. If you goof-up, it just means MACRO.WKS is modified and that means when you to create another worksheet, have fun?!?

P.O. Box 1475  
Lafayette, Ca. 94549

and checks should be made out to Joseph Wong.

Keys to remember

F9 - Recalculate  
ESC - step back

Sheet1

To access the main menu  
To get a "pop" calculator  
Appointment subsystem
