@6	6
Welcome to Chapter 10. In it we'll examine some of the power	0
of the menu-driven data search capabilities. With this menu,	0
you can retrieve almost any information or fragment of data from	0
any record. You can blast through 1,000,000 records and select out	0
8 consecutive records and display them to the screen in less than 10 seconds! You can retrieve any word that you entered into the	0
Comments field, along with the record in which that word occurred.	0
If you enter a fragment of a company name or a fragment of a word on	0
which you wish to select out records, the program will find them for you!	0

Now that we are back at the Search Menu, observe options 3 and 4.	0
They function in a manner similar to option 1, but with a few	0
differences. They will search through all comments and IDs for each	0
record at the same time. Secondly, they will do partial word or	0
partial number searches. This is handy for recalling conversations	0
entered as comments, where you can only remember keywords,	0
SOURCES ARTHUR LINE LINE RALL	11

You can experiment with this later. For now, enter an 'R'	0
to return to Master File Menu.	0
