TEXT1,C,79   TES
@2   2
@6   6
In this tutorial, we'll add 2 new activities for the   0
NBF199 truck. Each of those activities will have an appointment   0
date that will then appear in the Appointments reports.   0
-   0
The default date for appointments in the activity file is '01/01/1901'.   0
This date tells the program that you do not have a follow up   0
appointment for this activity (ie, 01/01/1901 means NO future appointment).   0
Any other date entered here will appear in the Appointments menu,   0
option 4, Master File Menu.   0
                                                                                                 0
@6   6
Whenever you enter a future appointment in the Activity file,   0
the program can create appointment schedules from a menu.   0
Also, every time you invoke this program, it will   0
do an analysis of all appointments scheduled for that day and   0
present that list to you. Additionally, if you have at least   0
one appointment for that day, the program will do a graphical   0
analysis of your appointments for the next 2 weeks and present   0
that graph to you. It does all this everytime you execute   0
the program, SERVICE.EXE, without any request from you.   0
                                                                                                 0
                                                                                                 0

Enter the name you want to relate an activity to.	0
At this screen you have 2 options: to enter the desired name or	0
to use the 'NEW' designator. 'NEW' should be use only intermittently	0
and restricted to those who would use this program in your absence.	0
When entering 'NEW', the program allows an unlimited number of 'NEW'	0
or unattached activities. These are not related to any records and are	0
grouped under a 'NEW' heading in the activity reports.	0
	0
If you enter a partial word, the program will attempt to find a match.	0
If more than one partial match is made, you will be prompted for another	0
entry.	0
	0
If you are finished entering records, touch the space bar once to remove	0
'NEW', followed by a Return. This will take you back to the prior menu.	0
