About Copyto Ver 2.0

An Explorer Add-on that adds a menu "Copy to..." to copy, move, delete, update, synchronize files in two folders. There is a briefcase-like function that can synchronize files in two folders with file-type filtering and the exclusion of specified folders. Display the "Preview window" before execution. You can select or deselect files,and change copy direction on the window by right-mouse click. You can run Copyto.exe at the DOS prompt or created shortcut link with command line options. This version is thorough improvement on the "Preview window".

- You can run Copyto.exe at the DOS prompt or created shortcut link with command line options.
- Batch operation by using MS-DOS batch file.
- Supports UNC paths.

Copyto is "Shareware". This means that we have made the software available to you for free evaluation. You are entitled to evaluate the software for up to 30 days without obligation to pay.   After 30 days,if you decide to keep the software, you must register your copy with us for a small fee.

Environment

Windows 95 and Windows NT4.0(with Service Pack 2)

I confirmed the main features work fine with US and Japanese version.

Install & Uninstall

Archive Contents

The WinZip Self-Extractor package consists of the following files:

cptsetup.exe	Copyto setup program file
copyto.exe	Copyto program file
copyto.hlp	Copyto help file

readme.txt	Readme file

Install

The distributed file of Copyto is distributed as a self-extracting ZIP file. To install it, run the self-extracting ZIP file.

Uninstall

Use the Control Panel, Add/Remove Programs item. Select the Copyto item (listed as "Copyto (Remove Only)") and click the Add/Remove button.

Upgrade Instructions

Follow the installation instructions above.

Using Copyto

To start Copyto, do one of the following:

Run from Explorer
 1.Right click on multiple files and/or folders you want to operate on in an Explorer window.
 2.Select the operation mode(copy,move,delete,update) and the target folder,other options.
 3.Click OK or Apply to perform the operation, or Cancel to abort.

Run from the Start menu,or your Desktop
 1.Click the Start button,and then select Programs and point to the "Copyto" folder.
 2.Click Copyto.
 3.Select the source folder and the operation mode(copy,move,delete,update), the target folder,other options.
 4.Click OK or Apply to perform the operation, or Cancel to abort.

Create the shortcut to Copyto with current settings
 1.Select the source folder and the operation mode(copy,move,delete,update), the target folder,other options.
 2.Select the Shortcut tab.
 3.Type a name for this shortcut.
 4.Type a location where you want to store it.
 5.Click the "Create shortcut with current settings" button.

Operation Mode

Copy and Move
- Copies/Moves selected files or folders to target location.
- If the operation is being performed on a folder with branches, the operation can also be performed on the entire branch.

Delete
- Deletes selected files or folders.
- Select options to Move to Recycle Bin or Do not move to Recycle Bin.

Update,Synchronize
- Updates selected files or folder to target location.
- Briefcase like function that can synchronize files in two folders.
- Display the "Preview window" before execution. You can select or deselect files on the window by Right click.
- Select the following methods,
  - Update(Changed files only)
  - Backup(New and changed files)
  - Synchronize(Backup + delete extra files on target)
  - Backup both ways
  - Incremental Backup(Archive attribute files)

Incremental Backup : Backs up files that have changed since the most recent Incremental Backup. All files that have the archive attribute on are backed up. When the backup is complete,the archive attribute are turned off.

Option Settings

Folder

[Source]

Specifies the files or folder you want to operate. Specify multiple files by using wildcards.

[Target]

Specifies the target folder.

Use the browse button to easily choose.

[Operation Mode]

Select the operation mode.

Enable "Synchronize" and "Backup both ways" when specified the one folder only at Source.

Update

[Include Subfolder]

When this box is checked, Copyto searches all the folders within the folder.

[Exclude System and Hidden files]

[Exclude Hidden Folders]

[Exclude Inaccessible files]

[Move to Recycle Bin on delete]

[Move old files to Recycle Bin on replace]

[Display Preview window]

Display the Preview window before execution. You can select or deselect files in the list by Right click.

[Display Warning about Not enough space on the disk]

[Display "Nothing to do" dialog]

[View logfile when finished]

[Play sound when displayed Preview window]

Play a sound specified "Play sound when finished"in Options tab when displayed Preview window.

[Collapse All when displayed Preview window]

Filter

[Exclude folders]

To exclude specified folders, click the Add or Delete "button",or click the right mouse button,or use drag and drop from explorer.

[Filetype filter]

Filetype filtering:

All　　　All files

Include Include files by specified file extensions

ExcludeExclude files by specified file extensions

For example, **.BAK;.TMP;.~??**

Note : 　Multiple file specifications should be separated by semicolon.

　　　　The * and ? wildcards are allowed.

Options
