Using Numerology Star Reader 11.0

Enter all birthdays and change the current date if necessary. If you do not know any of the required items, make your best guess. After you have entered required information select any number of options. Your readings will be clearly displayed. Any day can be selected. You can check your past, present or future. Lucky and unlucky numbers can be the same. For Power and Luck Readings longer bars are better. For dream interpretation just enter (in small letters only) what you dreamed of (one object from your dream at a time) and click on the DREAMS button. So, for example, "car" is one object and "ice cream" is also one object. Your dream will be explained no matter how many things you saw in it. Please note that different things can predict the same outcome, so don't be

surprised if you entered "field" and the explanation refers to both "rice" and "field." Why? Because some of the explanations go back hundreds of years! For name interpretation just enter any first name, make sure that in Your Birthday section the correct birth year is selected and click on NAME - YEAR button. For superstitions just select a superstition from the drop down list box and click on the SUPERSTITIONS button. For daily activities predictions just select any activity from the drop down list box and click on the PREDICTIONS button. For love spells enter the first name of the individual you want to put your love spell on and click on the SPELLS button, then just follow instructions.

To receive your past life reading select any year between 9000 BC and 2000 AD (if you don't specify explicitly AD or BC, AD years will be used), choose occupation and a clue from the drop down list boxes and enter an age between 1 and 99 in the box under the "AGE" text. Then click on the PAST LIVES button and answer all the questions. Your past life reading will be clearly displayed. (If you are not sure about occupation or clue, choose "none" for both and make your best guess about the age. Now, let me explain a couple of things. Years between 9000 BC and 2000 AD refer to the time when you think your past life event took place. Age refers to your age at that time. Occupation refers to what you think you did for a living at that time. Clue refers to an event, a person, or an object in some way associated with your experience. Depending on your past life or any other paranormal experience you have had, you will be asked a number of questions. Please answer all of them to the best of your abilities and recollection!)
