## **Castillo TextEditor, the solution to all your editing needs for Windows 95/NT4**

The use of *Castillo TextEditor* is very similar to the use of any other Windows application so there is not much to document.

### **To Open a file:**

- 1.- Click on File-Open, and there select the file you want to open
- 2.- Open the Explorer or the File Manager and drag to the *Castillo TextEditor* window the file or files you want to open. This technique is particularly useful when you need to open multiple files at once.

### **To Cut/Copy the Selection:**

- 1.- Select the text you want to copy to the clipboard, and click on Edit-Cut, Edit-Copy depending what you want to do.
- 2.- To paste the text elsewhere set the cursor to another position and click on Edit-Paste.

### **To Find a Specified Text:**

- 1.- Click on Search-Find and there you will be prompted for the text you want to find write it.
- 2.- Click on Find Next

### **To Find a Specified Text and replace it for other:**

- 1.- Click on Search-Replace fill in what to find and with what you want to replace it.
- 2.- Click on Find Next, Replace or Replace All depending on what you want to do

### **To Set the WordWrap**

- 1.- Click on View-WordWrap

### **To Change the Font of a particular text:**

- 1.- Click on View-Font
- 2.- Select the font you want to use.

### **To Encrypt or Decrypt a Text:**

- 1.- Click on Encrypt-Encrypt/Decrypt File (Standard) or Encrypt-Encrypt/Decrypt File (Safe) and select a password, later make the same previous selection and write the correct password and the text will be decrypted.

### **To Export Text to Mac or Unix:**

- 1.- Select File-Export To-Mac or File-Export To-Unix and the text will be exported.

### **To Print:**

- 1.- Click on File-Print and there click on OK, by clicking on File-Print Setup you may change the printer's setup and configuration.

### **Clipboards:**

Castillo TextEditor provides access to two clipboards, the common Windows clipboard and an internal clipboard.

The usage of both is the same, with the difference that when you close Castillo TextEditor

the contents of the internal clipboard is emptied and that othe application can't access Castillo TextEditor's internal clipboard.

**Castillo TextEditor, the solution to all your editing needs for Windows 95/NT4**

## **Syntax Highlighting**

Castillo TextEditor supports syntax highlighting for HTML, C, Java and Pascal/Delphi. This feature has a special value to all web and software developers. Developers can now browse and edit lines of code quickly and easily.

### **Syntax:**

\*.PAS: Pascal/Delphi

\*.C, \*.CPP: C/C++

\*.HTM\*: HTML

\*.JAV\*: Java

Castillo TextEditor does not check for correct syntax, it checks correct keywords. Checking and correcting syntax is beyond the scope of a text editor.
