

Inside Magic

This hybrid CD-ROM plays on both Windows and Macintosh computers

Recommended Windows system:

486/33MHz with 8 MB RAM, Windows 3.1 or higher, 8 MB hard disk space available, SVGA display, double speed CD-ROM drive, MPC 2-compatible sound card (22KHz, 16-bit).

Recommended Macintosh system:

68040 or higher, System 7.0 or higher, 8 MB RAM, double speed CD-ROM drive.

Set up and installation

To install Inside Magic on Windows:

1. Start Windows.
2. Make sure you have QuickTime for Windows v2.0 or later installed on your system (see below).
3. From the Windows Program Manager, choose File, then Run.
4. At Command Line, type D:\SETUP.EXE (where D: is the label of you CD-ROM drive. If your CD-ROM drive has another label, please enter that instead).

The Inside Magic Setup program will prompt you to indicate the hard disk on which you would like the program group installed. The Setup program will then create an Inside Magic icon inside an H M I icon group.

For best performance, we recommend that you use Inside Magic with at least 8 MB of virtual memory enabled. Please consult your Windows documentation for instructions on how to set virtual memory.

QuickTime for Windows 2.0.3

The QuickTime 2.0.3 for Windows installer has been included on this CD-ROM in the folder labeled "QUICKTIM". QuickTime 2.0 has been tested thoroughly with Inside Magic and it works fine as well.

Hints for using Performances in Inside Magic

- If the lesson you are viewing has a Performance linked to it, you'll find an icon for you to click on in the upper right-hand corner of the screen.

- Once the Performance has concluded, a hidden "Recipe Card" will be active but hidden. The Recipe Card is a mini index linked to the lessons used in that performance. You can find the Recipe Card for a performance by rolling your mouse around the bottom half of the screen.

- Recipe Cards are not active during Performances

- If you wish to skip to the end of a Performance to gain access to a Recipe Card, just hit the space bar at any time during the Performance.

- Recipe Cards are only visible to users who have used the password and received the Insider's Pass at start-up time.
