# Vision of the Internet

- It is not possible to predict anything in the year 2020
- In the year 2000, Internet will :
  - Have more than 100 million connected hosts
  - Have more than one million connected networks
  - Have traffic which exceeds voice telephony
  - Be ubiquitously available worldwide
  - Be ubiquitously available by all transport media
  - Support thousands of different applications
  - Be a seamless, intrinsic part of every communicative and collaborative aspect of our lives
  - Dramatically alter institutional, business, financial and political boundaries

Internet Host Counts 1990-2000

hosts

1,000,000,000

187 Million Internet Hosts

100,000,000

Projected Values

NOW

10,000,000

Historical Values

1,000,000

100,000

Reaching the Visions - Problems

- Ineffective telecom competition
- Non-cost-oriented transport
- Government regulation
- Impediments to bottom-up information infrastructure
- Changing institutions
- Changing and educating people

Killer Applications

- **WWW and clients (they're here)**
- **Automatic hyperlinking**
- **Advanced Knowbots and other distributed information discovery tools**
- **Object oriented collaborative tools**
