KPT QuickShow LT 1.2

This is a nice little slideshow utility that you can use for impromptu presentations, electronic portfolios, sorting through images, and viewing Quicktime™ PICTS and movies. Just double-click to play all Pict files, JPEG/JFIF files, and Quicktime™ movies in the same folder as a continuous slideshow. Use it with impunity! It's tiny enough (32k) to fit easily onto a disk full of images or to have hundreds of them scattered throughout your system. We hope you'll soon find it an indispensable tool.

Some features from previous versions have been discarded and replaced with the following new improvements:

•Options to scale small images up and large images down independently
•Reads JPEG/JFIF files
•Optional display of file names during slideshow
•Fades to black at launch and quit
•Can display large images even with little RAM allotted
•Option to save preferred settings

This is freely distributable software, but we do ask that the HSC splashscreen and credits at the beginning be left intact.

KPT Glass Lens Screensaver

This is a new screensaver module that will run with Berkely Sytems' After Dark™ software. To install, simply drop it into your After Dark Files folder. Of course, you need After Dark™ or compatible software for it to run.

When your system has been inactive for the prescribed time period, it will Glass Lens the heck out of your screen, with drop shadows too! Yow... If you are not familiar with Kai's Power Tools, you should really check 'em out. This KPT Glass Lens effect is one of

37 different filters shipping as Kai's Power Tools 2.1, from HSC Software.

VOL 1-5 CATALOGUE•TEXT

The enclosed Excel file can be imported into your existing catalogues, provided you have the full version of Kodak Shoebox. This allows you to automacally update your database of images. Consult your Kodak ShoeBox manual for details.

Enjoy!
