About This Updater

This updater will update CopyDoubler™ and CopyDoubler™ Lite 2.0 through 2.0.5 to CopyDoubler™ 2.0.6. This updater does not update any other component of the Norton DiskDoubler Pro package.

Using This Updater

Update - Click this button to proceed with the updating process. The installed version will automatically be updated if it can be located. If CopyDoubler cannot be found, you will be prompted for the file's location. To always prompt for file locations, for example, if you have copies installed on multiple disks, hold down the Option key while clicking the "Update" button. After the updating process is finished, select Restart from the Special menu in the Finder to ensure that the latest version of CopyDoubler is properly loaded.

Save... - Click this button to save this descriptive text as a SimpleText/TeachText file.

Copy To Clipboard - Click this button to copy this descriptive text to the Clipboard.

CopyDoubler 2.0.5 Changes

- Fixed bug that would set the modification date incorrectly when copying folders.

CopyDoubler 2.0.6 Changes

- CopyDoubler is now compatible with System 7.5.2.

Distribution Restrictions

This updater and associated Read Me files may be freely distributed provided they remain in their original state as a DiskDoubler SEA. No portion of this update may be distributed by itself.
