Topic Number	Subject	Description
FXP5014	The FAXport Macro for Microsoft Word (Ver 6.0) for Windows	The macro allows you to make the selection of FAXport as your printer a simpler operation and to open an existing data base in the FAXport phonebook for doing mailmerge.
FXP5015	FAXport FAXmenu Buttons descriptions and how to use them for Word for Windows, Excel for Windows, Office for 95, Maximizer and Act!	The macro allows you to make the selection of FAXport as your printer a simpler operation and to open an existing data base in the FAXport phonebook for doing mailmerge with a number of Windows Programs. These programs are: Word for Windows, Excel for Windows, Office for 95, Maximizer and Act!
FXP5016	Send Log Viewing problems in FAXport Administrator	A customer using the FAXport Administrator to connect to his server and view the send log is getting a faxport.out error after receiving approximately 490 out of 600 entries.
FXP5017	Uninstalling a FAXport FAX Server operating under Windows NT and Windows 95	Under certain conditions you may be required to uninstall your FAXport FAX server software.
FXP5018	Compatibility issues with 32 bit FAXport 5.0 Server and new versions of WINport 5.0a	In some cases, people who have installed an 'early' release (09/01/95) of FAXport 5.0 32 bit FAX server have found that they cannot install the WINport 5.0a 32 bit modem server over top of the same Windows NT server.
FXP5019	How to Install FAXport from CD ROM Software Using SETUP and Upgrade Diskettes	When attempting to install the FAXport software from the CD ROM provided, some people are not certain as to what steps are needed to be followed. This technical note will provide more detailed information on these steps to help ensure a successful installation.
FXP5020	CD ROM Setup Guide for Installing FAXport 32 bit Server	The following information is designed to allow you to quickly install the FAXport 32 Bit Server into either the Windows 95 or Windows NT operating systems.
FXP5021	Quick CD ROM Setup Guide for Installing FAXport 16 bit Server	The following information is designed to allow you to quickly install the FAXport 16 Bit Server.
FXP5022	Installation Guide for FAXport and WINport	There can be confusion as to which software needs to be installed. Often the wrong version of a program is placed into the computer system.
FXP5023	Setup of the DigiBoard™ Non-Intelligent Serial Adapter for Windows NT	This procedure is intended for DigiBoard™ non-intelligent serial adapters. DigiBoard™ recommends a non-intelligent multiport adapter with 16C550 UARTS for best results.
FXP5024	Configuring the 'FAXPRINT ON FAX' function in Windows NT for use with FAXport 5.0 32 bit Client	In order to 'Print' documents to the FAXport 32 bit Client in a Windows NT operating system you must configure the printer driver manually. This technote outlines how this is done.
FXP5025	Difficulties installing FAXPRINT printer driver with Windows 95	After installing the FAXport client, it is discovered that the FAXPRINT printer driver has not been properly installed.
FXP5026	Failure of 16 bit FAXport Client to connect to FAXport server under UDP protocol	Using CD#3, after installing the 16 bit FAXport client for UDP, cannot connect to the FAXport server.
FXP5027	Location and File names for FAXport and WINport Setup Guides on CD ROM #3 and 4	Using CD#3 and #4, when you use the view function during the installation to see the contents of the setup guides you find that the wrong version is displayed.
FXP5028	Common connection problems between Windows NT and Windows 3.1/3.11(Windows for Workgroups) when using FAXport.	This technical note covers six common problems and situations encountered in network connections between Windows NT and Windows 3.1, 3.11 and Windows For Workgroups 3.11 workstations.
