

**Universität Stuttgart**  
**Fakultät Informatik**

Parallaxis Version 2 User Manual  
*Second Edition* – Release 2.1x  
A Massively Parallel Programming System

Ingo Barth  
Thomas Bräunl  
Stefan Engelhardt  
Frank Sembach

Computer Science Report  
No. 2/92      Feb. 1992

2nd printing    September 1992

All rights reserved.

Copies of this report may be ordered from:

Dekanat der Fakultät Informatik, Universität Stuttgart  
Breitwiesenstr. 20-22, D-7000 Stuttgart 80, Germany

phone: +49 (711) 7816-371    fax: +49 (711) 7816-424

**NOTICE**

The Parallaxis software package is licensed free of charge. Therefore, we provide absolutely no warranty of any kind in any case. The Universität Stuttgart and the authors provide the Parallaxis software package "as is" without warranty of any kind, either expressed or implied, including, but not limited to, the implied warranties of merchantability and fitness for a particular purpose. The entire risk as to the quality and the performance of the program is with you. Should the Parallaxis software package prove defective, you assume the cost of all necessary servicing, repair or correction.

In no event may the Universität Stuttgart or any of the programs' authors be liable to you for damages, including any lost profits, lost monies, or other special, incidental or consequential damages arising out of the use or inability to use (including but not limited to loss of data or data being rendered inaccurate or losses sustained by third parties or a failure of the program to operate with programs not included in the Parallaxis software package) the program, even if you have been advised of the possibility of such damages, or for any claim by any other party.

**COPYRIGHT AND PUBLIC DOMAIN LICENCE**

The Parallaxis software package is being distributed by the Universität Stuttgart as public domain software. Copyright © is with the authors, Ingo Barth, Thomas Bräunl, Frank Sembach, and Stefan Engelhardt at the Universität Stuttgart, IPVR, Germany. There is no warranty in any case as stated in the paragraph above.

You are free to use and copy the original Parallaxis software package free of charge for *non-commercial* applications, provided that

1.) the notices on copyright, public domain, and no warranty of this page as well as a reference to this report are included,

2.) you return a filled-in copy of the attached registration sheet,

which gives us some information on the distribution of our software. An intended commercial use requires the written consent of the authors. You may obtain the Parallaxis software package for any of the following computer systems:

- Apple Macintosh (Mac OS)
- SUN 3 (Unix OS 4.0)
- HP 9000/300 (Unix)
- HP/Apollo 700 series
- IBM-RS/6000 Risc System
- IBM PC/AT or compatibles (DOS or OS/2)
- SUN 4 / Sparcstation (Unix OS 4.0)
- HP /800 series (Unix)
- DECStation 2100 or compatibles
- MasPar MP-1

For receiving your copy of the Parallaxis software package and the Parallaxis user manual, send us a fee of DM 10 (airmail outside Europe US\$ 15) for each manual and DM 5 (outside Europe US\$ 5) for each floppy disk (one for each computer system version). The software without documentation is available via "anonymous ftp" from:

ftp.informatik.uni-stuttgart.de (129.69.211.1)  
in subdirectory pub/parallaxis

For mailing bug reports (no calls, please!), suggestions or your favorite Parallaxis application, also contact the address below:

**ORDER FOR THE PARALLAXIS V2 SOFTWARE PACKAGE**

Please return *with payment included* to: Dr. Thomas Bräunl  
Universität Stuttgart, Fakultät Informatik  
Postfach 10 60 37, D-7000 Stuttgart 10  
**Germany**

Name: (first, last) .....  
Company: (if any) .....  
Address: (street) .....  
(city, ZIP-code) .....  
(country) .....

E-mail: .....

Intended Use of Parallaxis: .....

Application Areas: .....

Printed Matter (Europe: DM 10.00 per copy / outside Europe: US\$ 15.00 per copy):

Parallaxis User Manual

Floppy Disks (Europe: DM 5.00 per floppy / outside Europe: US\$ 5.00 per floppy):

- Apple Macintosh (SE or II) (on Macintosh 3 1/2" DS floppies)
- Apple Macintosh II w/ FP co-proc. (on Macintosh 3 1/2" DS floppies)
- IBM PC/AT or compatible w/ DOS (on IBM-PC/AT 3 1/2" HD floppies)
- IBM PC/AT or compatible w/ OS/2 (on IBM-PC/AT 3 1/2" HD floppies)
- IBM-RS/6000 Risc System (on **IBM PC** readable 3 1/2" floppies)
- SPARCstation or Sun 4 (OS 4.0) (on **IBM PC** readable 3 1/2" floppies)
- Sun 3 workstation (OS 4.0) (on **IBM PC** readable 3 1/2" floppies)
- HP 9000/300 (on **IBM PC** readable 3 1/2" floppies)
- HP /800 series (on **IBM PC** readable 3 1/2" floppies)
- HP/Apollo 700 series (on **IBM PC** readable 3 1/2" floppies)
- DECstation (on **IBM PC** readable 3 1/2" floppies)
- MasPar MP-1 (**massively parallel**) (on **IBM PC** readable 3 1/2" floppies)

Parallaxis Application Programs (on **IBM PC** readable 3 1/2" floppies)

Total amount enclosed: \_\_\_\_\_ DM / US\$  
(Cash or check to "Universität Stuttgart")

**REGISTRATION SHEET FOR THE PARALLAXIS SYSTEM**

Please fill in the blanks and return to:

## Contents

1	Introduction .....	8
2	Installing the Simulation System .....	12
3	Using the Parallaxis Compiler .....	13
4	Using the PARZ Simulator and Debugger .....	15
4.1	Using the PARZ Simulator .....	15
4.2	Using the PARZ Debugger .....	16
5	The Model of Massive Parallelism .....	26
6	The Parallaxis Programming Language .....	28
6.1	Relation to Modula-2 .....	28
6.2	Specifying Processor Networks .....	29
6.3	Scalar and Vector Data .....	37
6.4	Vectorized Execution .....	37
6.5	Parallel Data Exchange .....	39
6.6	Data Reduction .....	44
6.7	Standard Procedures .....	45
6.8	Standard Functions .....	47
6.9	Graphics Interface .....	50
7	The PARZ Intermediate Language .....	53
7.1	Specifying Processors and Connections .....	53
7.2	Data Management .....	53
7.3	Variables and Constants .....	54
7.4	Pseudo-Assembly Commands .....	57
7.5	Standard Functions .....	64
7.6	Standard Procedures .....	65
7.7	Graphics Interface .....	67
8	Compiling Executables .....	69
8.1	PARZ to C .....	69
8.2	PARZ to MPL .....	70
9	Tools .....	72
10	Sample Programs .....	74
10.1	Maximum Search .....	74
10.2	Image Rotation .....	79
10.3	Prime Numbers .....	81
10.4	Sorting .....	82
10.5	Numeric Integration .....	84
10.6	Cellular Automata .....	84
10.7	Fractal Geometry .....	85
10.8	Systolic Matrix-Multiplication .....	87
11	Parallaxis Applications .....	89
11.1	Stereo Vision .....	89
11.2	Hidden-Surface and Ray Tracing Algorithms .....	90
11.3	Solving Linear Equation Systems .....	92
11.4	Fast Fourier Transformation .....	93
11.5	Simulated Annealing .....	93
11.6	The n-Body Problem .....	94
