Group Project — Electronic Yearbook Web Site

Develop an electronic yearbook Web site that showcases memories and events of the school year as a group project.

a) The Web site should contain at least:

- six Web page documents
- an new, original school logo designed in Fireworks
- scanned or digital photographs of school events and individuals
- appropriate content
- animated Flash text
- a guest book

b) Tips for organizing the group project and developing the Web site include:

- appoint a group leader to organize the tasks
- assess the strengths of the group members when assigning tasks
- follow the development process outlined in the text

c) Following the Web site development process outlined in the text, create the Web site.

d) Run through all the pre-publishing checks and test outlined in Chapter 10 in the text and add appropriate meta data to the home page.

e) Publish the Web site to a non-virtual host.
