

Travel Agency Web Site Project

Develop a Web site for a travel agency by completing the following steps:

- a) Define a new Web site named Travel Agency in a folder named Travel Agency.
- b) Add five files to the Web site, naming them index.htm, flights.htm, tours.htm, cruises.htm, and contact_us.htm.
- c) Each Web page document should include:
 - tables for arranging content
 - a style sheet to format the content
 - appropriate page titles
 - a company logo created in Flash or Fireworks
 - a footer with copyright information and your name
- d) Create content for the Web page documents.
- e) Modify the index.htm Web page document to include a Flash animation.
- f) Modify the contact_us.htm Web page document to include a form with check boxes, radio button groups, and List/Menu objects that allow the user to request pricing or detailed information about flights, tours, or cruises.
- g) Apply design concepts to the Web page documents.
- h) Use a style sheet to format the Web page documents.
- i) Check the spelling in each Web page document.
- j) View the Web page documents in a browser window and test the forms and hyperlinks.
- k) Print a copy of each Web page document from the browser.
