

How to Register Guy Friday

The Register... command, found under the Apple menu, explains how to register this program. You can register with Digital Money, which is a complete, well thought-out payment system for software. If you have a modem, Digital Money allows you to register electronically. Otherwise, you can use a standard voice telephone and a credit card. If you are still in the Stone Ages, or, for that matter, in Europe, you can register through the postal system.

Thanks for registering. I spent a lot of time on Guy Friday and I think it is a useful program well worth the small price I am requesting.
