

Gomer-32 HTML Editor

Ordering Information

Registration

How much does it cost to register?

The registration fee for this program is just \$20 (US).

How much does it cost to upgrade?

If you are a registered user of a previous version of the editor, your current registration number will work on this version at no extra charge.

Can I use my credit card to register?

Yes, you can register the program with your Visa, MasterCard, American Express, or Discover card. See the file "*cardform.rtf*" or contact Stoopid software by e-mail for more information.

Do you accept POs?

In situations where other registration methods can not be applied, yes. Purchase orders must be approved in advance, and are subject to a minimum amount. Please contact ordering@stoopidsoftware.com for details.

Do you have a reseller program?

No plans are currently underway for developing a reseller program for this application. Please contact stoopid software by e-mail with questions.

Questions

What do I get for registering?

Upon registration, you will be sent a registration number which allows continued use of the program beyond the 30 day trial period. Registered users will also receive technical support by e-mail.

All registered users with a password compatible browser will automatically be given access to the user area at the stoopid software website. This area contains exclusive free web art files and helpful links to some of the best design resources on the web.

Can I get a copy of the program on diskette?

Because a copy of the program is required before registration, sending an additional copy on disk would increase the cost of registration without providing similar benefit. A copy of the program can be ordered on disk for an additional fee, but downloading the latest version directly from the website is faster, more reliable, and ensures getting the most recent version while keeping this program as one of the best values in web design software.
