

# Introduction

**CT Calendar** is, well, a calendar for your desktop. We have tried to keep it small enough to keep on your desktop, if you wish, but large enough to read without a magnifying glass.

There is really only one thing about the program that merits special mention here - **right-clicking on the ACTIVATE SCREENSAVER button will hide the button, and display a digital clock (right-click on the clock to reverse the process), right-clicking anywhere else on the program will alternately expose and hide the “controls” part of the program.**

Please be certain to explore the **Options** dialog, as there are many customizable features of **CT Calendar** that can be accessed from there. These include:

1. Format (U.S. or Non - U.S.).
2. Always on top (yes or no).
3. Full dialog or calendar only on start-up.
4. Calendar position on start-up.
5. Digital clock (showing or not).
6. The color configuration of the calendar.

# Registration

**CT Software**  
759 Galleon Lane - Elk Grove, IL 60007  
USA  
1-800-617-7740

**This program is free of charge with the registration of any CT Software Windows 95 shareware program, otherwise.....**

This program is shareware, and, as such, may be used freely for a period of 30 days. If, after the 30 day evaluation period expires, you find this nifty little utility useful, and plan to continue using it, you are required to register the program.

By supporting the shareware concept you are helping to ensure its continuation, which, I think you'll agree, will benefit us all.

If you wish to register the program, we do accept VISA and MASTER CARD. Our toll-free registration number is **1-800-617-7740**. The cost of registration is **\$10.00**. If you would like a copy of the program on diskette, there is an additional **\$2.00** shipping and handling charge.

If you prefer mail, please send a check in the amount of **\$10.00** to the above address. Be sure to include your name, address, e-mail address, and the exact name of the program, so that we can immediately send you the registration information. If you would like a copy of the program on diskette, there is an additional **\$2.00** shipping and handling charge.

If you are a **CompuServe** subscriber, the program can be registered on-line. Go SWREG - the SWREG# is **12605**. Upon receipt, a registration number will be e-mailed immediately.

## On-Line Support

On-line support can be accessed through the **CT Software Forum on America Online** (keyword: **CT Software**). All of our programs and required support files can be easily found there, as well as the CT Software Message Board. In addition, valuable tips and information are posted regularly in our **Tip Of The Day** feature!

Please feel free to visit our World Wide Web site, from which you can download all of our software, and access complete product descriptions of the very latest versions of the shareware offered by CT Software, in addition to offering links to many other excellent shareware sources. The **CT Software Home Page URL** is:

**["http://members.aol.com/ron2222"](http://members.aol.com/ron2222)**

## Other Programs by CT Software

### CT HotSpot

**CT HotSpot** is a small utility with which you can create 2 hotspots - 1 to turn your screensaver on, and the other to turn it off. This can be quite useful when downloading a large file, doing a tape backup, or when using the Windows 95 utility, *DEFRAG*. Having a screensaver come on during any of these activities can wreck havoc with your computer and your files.

### CT Launcher

**CT Launcher** is a small 32 bit program which places an icon in the Windows 95 taskbar tray. Right-clicking on this icon will bring up a menu of programs to launch. This menu is totally user configurable. You can add, edit, and remove items (including optional command parameters) from the menu through the **CT Launcher Setup** program, which can be accessed by left-clicking on the taskbar icon.

### DiskCopy

**DiskCopy** is a simple little 32-Bit program for formatting and creating duplicate disks. **DiskCopy** will prompt you for the number of copies you have in mind, making for a very quick operation. **DiskCopy** does not perform an actual track by track copy, it simply copies the directory structure and files, but 99% of the time, that is all that is really required.

### FormPost Edit

**FormPost Edit** is a special text editor for those of us who have to contend with posted Web forms. In addition to the many standard editing capabilities that the program has, its specialty is interpreting the extraneous characters contained in posted Web forms, turning them into easily readable text. Of course **FormPost Edit** can then either save or rename the form, as you wish, and also send it to your printer. In addition:

1. **FormPost Edit** offers full font and color control, and will save your settings.
2. **FormPost Edit** features a toolbar, complete with help balloons, which can be toggled on and off, as you wish.
3. **FormPost Edit** will allow you to both print and save to a file selected text only, if desired. Simply select the text with the cursor before invoking the print or save as command, and only the selected text will be considered.

### Notebook for Windows 95

There is one, and only one point to this program - to replace Notepad. **Notebook** is not a word processor. It's sole purpose is to view and edit text files. **Notebook** does have 6 major features (and several minor ones) which we believe make up for Notepad's inadequacies:

1. It will open **very large files**, and allow you to edit them.
2. It features full font control - you can set the font name, style, size, and color, and your settings will be saved when you exit the program. It will look better on your screen, and do a much better job of printing.
3. **Notebook** has a toolbar complete with help balloons.
4. **Notebook** features *DRAG AND DROP* text editing. If you want to move a block of text, just use the mouse to select it, and drag it to where you want it.
5. **Notebook** supports otype mode. While the default editing mode is insert, hitting the INSERT key on your keyboard will change that to otype.
6. **Notebook** can both print and/or save to a file **selected text only**, if desired.

### QuickCopy

If you find yourself frequently accessing or typing the same text over and over again for copy and paste operations, this is a program you'll like! **QuickCopy** is a small 32 bit program which places an icon in the Windows 95 taskbar tray. Right-clicking on this icon will bring up a menu of text files, which can be very quickly copied to your Clipboard. This menu is totally user configurable. You can add, edit, or remove items from the menu through the **QuickCopy Setup** program, which can be accessed by left-clicking on

the taskbar icon.

## Reminder

**Reminder** is a little program that does just what the name implies. It leaves reminders for you or for someone else who also uses your PC. This reminder will appear the next time the computer is turned on. You can send yourself or someone else a note, a "things to do" list, or whatever tickles your fancy. Once you click on the POST button, a shortcut is created to the document, and placed in your StartUp folder. Upon loading the file, the shortcut is automatically deleted, so if you choose to edit a previously posted note, you will need to post it again. The files the program generates are easily maintained. The currently loaded reminder can be deleted with the click of a button, and by clicking on PURGE, all of your reminders will be sent to the Recycle Bin.

## Safety Net Pro

**Safety Net Pro** is a highly acclaimed utility for backing up key files by file extension. It has one default setting - to backup key "windows" and system files including INI files, Registry Files, CONFIG.SYS, and AUTOEXEC.BAT- and 5 user configurable options. **Safety Net Pro** could easily backup all of the document and/or database files on your drive, for example, with the directory structure **intact**, and it can Zip them to disk. **Safety Net Pro** has several advanced features that **Safety Net** lacks, including built-in 32-bit zip compression (PKZ v2.04 compatible) and the ability to span Zip files across multiple disks. **Safety Net Pro** can also print file lists, print your directory tree, and make a boot disk.

## Winsock Swapper

The purpose of **Winsock Swapper** is to automate the process of swapping various WINSOCK.DLL files for those of you who use more than one Internet service provider with your default Web Browser. With one quick double-click, you can swap up to three DLL's, and optionally launch your browser. It doesn't get any easier than that!

## YahtC

This game is a clone of the immensely popular game, Yahtzee. **YahtC** combines attractive 3D graphics with extreme ease of use. There are no complicated instructions, and no hidden forms. Each player's score is always visible. A sound card, while certainly not necessary, will greatly enhance the game, which produces sound effects when a player rolls the dice, "zeroes" out a scoring category, or rolls a "YahtC". The game will also keep a permanent record of High Scores, which can be easily cleared at any time. **YahtC** is fully functional, and supports up to 4 players.

## ZipWorks

**ZipWorks** is a full featured 32 bit ZIP file manipulator for Windows 95. The built-in 32 bit compression is fully compatible with PKZIP v2.04. With this program you can ZIP, UnZip, add comments to your ZIP files, test archive integrity, and repair damaged ZIP files. This program can create files across multiple disks, and can store directory structure, making it a pretty fair choice for a backup utility, though its "cousin", **Safety Net Pro**, might be a little better suited for that purpose. There is an option in the Preferences dialog to associate **ZipWorks** with the file extension "ZIP". We highly recommend that you take advantage of this very useful feature, which will add 3 right-click menu items to your appropriate zip files in Explorer - open, UnZip, and UnZip To Path. The primary help engine for this program revolves around the context-sensitive help concept that Windows 95 makes such liberal use of.

Your selection here will determine where **CT Calendar** appears on your desktop the next time it is loaded.

Selecting “Yes” will assure that **CT Calendar** will remain visible on your desktop at all times.  
Choosing “No” will allow other applications to hide the calendar.

Since U.S. date formats are different from the rest of the world, you must make the correct selection here for the program to work properly.

Various color options can be chosen here. Select the item that you wish to change, and click on the button to invoke the color dialog.

This selection will affect how the calendar appears when it is initially loaded.

If you select “Show”, a digital clock will replace the “Activate Screensaver” button. No functionality is lost, as clicking on the clock will still cause your screensaver to start. The button and clock can be toggled by right-clicking on the control.
