

Introduction

Anim8 displays several different animations on your computer screen.

Required Hardware and Software

Windows 3.X running in standard or enhanced mode. Anim8 will use an 8x87 compatible coprocessor if one is installed.

Installing the Program

Using the MS-DOS shell, or the Windows File Manager, create a subdirectory for the program. For example:

```
MKDIR C:\ANIM8
```

Then copy all files from the distribution disk into the subdirectory. For example:

```
COPY A:\*.* C:\ANIM8
```

The program is made up of the following files: ANIM8.EXE, ANIM8.HLP, and USERS_GD.WRI.

Using the Windows Program Manager, select the File menu and the New submenu. Then select the Program Group button and the OK button. Enter Anim8 in the Description field, and ANIM8.GRP in the Group File Field. Select the OK button.

Select the File menu and the New submenu again. This time, select the Program Item button and the OK button. Enter Anim8 in the Description field, and enter the location of the program in the Command Line field, for example:

```
C:\ANIM8\ANIM8.EXE
```

Select the OK button.

The program is now installed.

Automatically Loading the Program

If you want the program to be automatically loaded every time you start Windows, edit the WIN.INI file in your Windows directory.

Add the pathname of the program to the line beginning with "load=". For example, the following line causes the clock program and Anim8 to be loaded every time Windows starts:

```
load=clock C:\ANIM8\ANIM8.EXE
```

Running the Program

After starting the program, if you need further instructions, press F1 for help.

Distribution and Payment

Anim8 may be freely copied without cost, provided it is not changed in any way. If you find the program useful, please send \$5.00 to:
