Top Software Problem Report

If you discover a software problem (or "bug"), the information requested below is needed to isolate and fix it. Please be as specific as possible. See Section 8 of README.WRI for contact information.

Program Name and Version: *Top Draw* 1.0b

Reported by: **Name:**

                  Phone:

                  Date:

1. Symptoms:
(What happened that didn't work correctly or as expected?):

2. Error Message:
(If there is an error message, record it. If the error message is for a protection violation or other "hard" system error, it is important to record the module name and "at xxxx:xxxx" information.)

3. Steps to Reproduce the Problem:
(Record the exact steps necessary to reproduce the problem. If at all possible, start with a new drawing. If the problem only occurs in one of your drawings, please include a disk containing the drawing file.)
