2. About MCI CDAudio driver
(a) Make sure the audio cable of your CD-ROM drive has pluged into
your sound card.
(b) You need MCI CDAudio driver for listening SBM product's CDAudio.
Make sure this driver has been installed in your Windows, if it is not, you can
install it following these procedures:
  (1)Open Control Panel in Program Manager.

 (2)Doubel click Drivers in Control Panel to open Drivers Window.

(3)Click Add Button to open Add Window.

(4)Select [MCI] CD Audio and click OK button add this driver to your Drivers. Windows may ask you to insert a Windows installation disk to load this driver. When [MCI]CD Audio driver has been loaded and your CD-ROM driver has been installed properly, a pop-up window will display a message which will tell you a CD-ROM driver has been detected.

3. About your video driver
For correct color display, please check your video driver. SBM products need a 256 color display. According to the type of your VGA card, you can run Windows Setup to select a interrelated driver which will display SBM product properly.

4. Warring

Do not listen to the music while driving or operating heavy machinery.
