

Brycology
By Jean-Pierre Lapointe

I'm an artist that moved from the country (Charlevoix Region) to Québec City in search of a new universe. I went through the artistic worlds of painting, photography and sculpture. I tasted printing's inks and played with cinematographic and magnetic film. At the end of that uneven road I found a key. Ever since that day I have been doing computer graphics.

My name is Jean-Pierre Lapointe, I'm 35 years old and I'm a computer artist. I juggle with forms and pixels to create images. Each project is a challenge that pushes me to go further. Bryce has brought me most of my graphic pleasures and with it I share most of my creative work. The key that I found four years ago has "Bryce" engraved on it.

Today I bring you a view of my universe created with Bryce.

You are also invited to visit my web site at:
