

MELBOURNE MOVIE

I completed the Advanced Certificate in Art & Design at the Royal Melbourne Institute of Technology. I continued on with the Bachelor of Arts in Fine Art at R.M.I.T. University, finishing in 1996.

During this period I got into photography as a hobby and in 1993 I was a finalist in the Felix.H.Man Photographic Prize & Exhibition. The exhibition was held at the National Gallery of Victoria before touring around the state of Victoria for the next year. I have been lucky with my photography, in 1995 I received a local council Arts Grant. The projects aim was to photograph the intellectually disabled participating in leisure activities. The final photographs won awards and was a main feature of the Hume City Festival.

I have been using a computer for less than two years. When it comes to computers and software I'm basically self taught, learning as I go along. It's amazing how today's great software programs makes it so easy to produce such wonderful art.

Always learning,

kuzey

P.S. Hope you like my Bryce Animation. IF you have any questions about my work or would like to see more of my animations, please e-mail me for up to date information on my websites. Also if you have any Bryce questions feel free to ask.
