## 1.2   An introduction to F1 Manager

Introduction

Formula One Manager is a very comprehensize management game in which you take
control of a formula one management team  of your choice. It contains many
features and allows for  up to three players to take part. This version is
harddisk only and it requires 1.5 mb of ram.

## 1.3   Installing F1 Manager on your harddisk

Harddisk installation

This version of F1 Manager requires a harddisk. To install it on your harddisk
just boot from your harddisk, then insert the F1 manager program disk in the
drive. Double click on the disk icon and then double click on the 'F1-Install'
icon. The installation utility will then load. Before installation will start
you will need to select the installation mode. If you do not  know very much
about the computer select 'Novice' and then click on the 'Proceed' button. The
installation will then be fully automatic. You need 1 MB of free space on your
harddisk to install F1 Manager.

## 1.4   Features of F1 Manager

                Features

F1 Manager has the following features:

 - Up to 3 players can take part
 - You can select your team from any of the 13 teams
 - graphical representation of the race
 - Changing weather conditions
 - Buy new drivers & mechanics
 - Buy new engines
 - Pitstops during the race
 - compete for the drivers & constructors championship
 - improve your chassis during the season
 - Sponsors to put on your car
 - Team history
 - A Full
               editor
                is included so you can update all the driver data
   for the next season.

And Many,Many more.

## 1.5   How to play F1 manager

 Playing the Game

## 1.6   Tips & Tricks

```
Tips & Tricks

Write down all the setups you use for the qualifying sessions and
the race. This way when you race on that track again you roughly
have an idea what setup to use.

Start giving money for the development of a chassis right at the
start of the season. If you wait with giving money till the end
of the season you will have a very bad chassis next season.

Calculate exactly how much fuel you are going to put in your car
during the race. If you put too much in, the car is heavier and
subsequently will go much slower. ALWAYS put some extra fuel in
your car, because the fuel consumption is just an estimate.

Always make a pitstop if you tyre meter is very low, if you don't
your driver has a very high chance to spin or crash and be out of
the race.

If during the race it starts to rain do not make a pitstop right
away but wait a while until it gets a bit wet. If the track is
approximately 20% wet it is best to make a pitstop and switch to
wet tyres (W).

It you have warm weather select A or B compound tyres. C en D compound
tyres lose their grip very quick forcing you to make an early pitstop
```

## 1.7   Known bugs of F1 Manager

```
            Known bugs:

On some amiga 1200's with fast memory the sounds during the race
sound weird. I am not sure how this happens, but you can fix it
by using the 'NoFastmem' program supplied on your workbench
disk in the 'system' drawer.

If you find any new bugs please
            contact~me
            . Then I will try to
fix it as soon as possible.
```

## 1.8   About the Author

```
Contacting the author

## 1.9  How to use the editor

The Editor

Using the editor you can edit all the team and driver data
of the game. Use the left mousebutton to select a button to
edit.

When you edit a number, the minimum number you should enter is
1 and the highest 100.
