[About](#)

Particularities of Fancy Editor

- In the Fancy Editor built-in original file bookmark system. These bookmarks allow to go back to the file and positions in the file, on which was made bookmark having chosen respective item a menu, instead of that to wander long on trees of subdirectories.

- An Editor has a system Auto PageDown, which allows automatically scrolling text through given interval of time and allows You during reading in general not to concern keyboards.

- An Editor has disconnected window of short cuts, in which is displayed kit of short cuts for quick performing the different actions. In enclosed state window of short cuts constantly inheres before eyes of user, this allows quicker to remember hot keys of different actions. Use short cuts instead of the mouse vastly accelerates a functioning.

- A Window of editor not littered by buttons and unnecessary information, this allows to see more text that particularly suitable when reading. As well as be an option of full disconnecting panel with buttons. For quick functioning provided panel with the description quick keys, which also duplicates a panel of instruments.

- All adjusting an editor including size of window are saved automatically.

Main possibilities

- Quickly opens, suitable edits and saves files of any size, saved in RTF formats and plain TXT.

- Executes converting from ÎÀÎ (national code table, for Russia for example this ASCII866) in ANSI and back.

- Changes a drawing, size and colour of font but in the same way background color that much relieves a reading and prevents a tiring an eye.

- Executes simple formatting a text.

- Executes a autosaving of text, through given by You interval of time, with following its reconstruction. (This it is important for preventing the losses information under sudden switching off or computer starvation).

- Opens files given in the command line. (You may associate with this editor different types of files and open these files from the Explorer by double striking a button of mouse.

- Saves in the menu 'File' ten last opened files.

- Realizes a searching line in the file.

- Undo last wrong actions when editing a file.

- Has a possibility of deleting a current file from the editor.

Menus
