## Controls

# Animation Viewer Controls Help

### What image types can show Animation viewer?

Animation Viewer can show only gif files because this is a program that shows animated gif files. But it can also show non- animated gif files too.

## Controls:

**Open button:** This button is used for opening a new animated gif file

**About button:** This button shows about section

**Total Frames:** Shows how many frames(images) the picture has.

**Current Frame:** Shows the frame number that is being displayed.

**Play Animation-Normal:** Animation is displayed in normal frame order.

**Play Animation-Reverse:** Causes animation to be displayed reversely.

**Play animation slower:** When this is selected animation will be played slower.

**Select background color:** Changes background color. This is usefull if the animation gif file is transparent.

**|| button:** Stops the animation

**> button:** Plays the animation if animation is stoped
