future releases

For the unlucky ones: You can register the program for 25\$. Contact me at me e-mail adress for registering.

This will give you a lifetime registration of the program and will work in all future releases of the program. It gives you access to all the functions of the program as shown in the shareware version. It will also include a user manual in html form.

If you really are interested, I can build in your own ideas and features. Contact me at me e-mail adress.
