

Some Common Questions are:

- How do I use the breadboard/What do the internal connections

look like?

(A) Please read the help section entitled 'Using Breadboards'.

- How can I draw 'neater' wires?

(A) Use the shift key to constrain the drawing in the horizontal

or vertical direction. Release the shift key, and then repress

to reconstrain the drawing.

- How can I print more than one page of timing information?

(A) In this version you will need to move the scroll bar so that

the clock cycle you wish to start printing at is the first clock

cycle (left most) in the Timing Diagram window. Then choose

'Print' from the 'File' menu again.

- How can I show timing diagrams for the 7-segment displays?

(A) Check the 'Show all timing signals' checkbox at the bottom

of the Timing Diagrams window.
