

You can search for recipes that have certain words or phrases in their Title, Notes, or Instructions. For Notes you can use either of the Recipe Finders (Quick or Full). The procedure is the same as you use for any recipe searching:

- Bring up the Quick Recipe Finder, by clicking on Match What in either a Recipe File Window or the Recipe Browser.
- Type the word or words you want to match into the text box labelled Text in the Notes (there is a similar box in the Full Finder), then click OK or hit Return.
- Back in the Recipe File Window or the Recipe Browser, make sure that List Only Matches is checked.

The list of recipes will show only recipes which have the text that you typed somewhere in their Notes. You can see the entire list of recipes again by checking List All Recipes.
