

Revision Notes for Tradex

Jan 17, 2023

NOTE: If you're upgrading from a previous version, you will probably have to trash the Tradex Preferences file in the System Folder, or you will get a message stating that "Tradex is corrupted."

1.0

Original version

1.0.1 10 January 1994

- Better identification of Macintosh model and colour capabilities.
- Import and export (Save, Load and Merge) of tab-separated files with proper dates to enable import/export of Excel data files.
- Recalculation of min/max values on closing of data update window.

1.0.2 28 April 1994

- Colour icons.
- Minor changes to be compatible with the Recoder application.
