

PICT resources

To view a PICT picture:

- 1) Open Media Player 2.0 from the Finder
- 2) Push the **PICT** button on the window that appears
- 3) Select the PICT file that you want to open
- 4) Set the size for the image on the main window

NOTE: To scale the image to the screen size, click [Size of](#)

[monitor](#). To view the image at its normal size, leave

one of the two numbers (width and height) at zero.

5) To view the PICT resource, click **DO IT**

6) The mouse arrow and menu bar will now disappear, and your PICT

image will be displayed

7) If the dimensions you selected on the main window are larger

than the dimensions of your monitor, you will be shown a

scrolling window, so you can scroll to different areas of the

picture.

8) Click the mouse to return to the Media Player main window.

A sample PICT resource has been included in your Media Player 2.0 folder, entitled “**Media 2.0 PICT sample.**” You can open it and view it by following the steps above. It was recorded on a 13-inch screen, so you may need to downsize it to fit it on a 9-inch screen.
