

Future planned changes to Media Player 2.0

I am completely open to suggestions for future changes. Personally, I have pretty much run flat out of ideas for **Media Player** (and after only two versions!). So, if you would like to see some improvements, please e-mail or U.S.-mail me something... I love to receive honest mail between all the bills just as much as anyone else does.

I will gladly respond to all questions, comments, etc. Just drop me a line!
