

CONNECTIX DESKTOP PRODUCTS

CONNECTIX DESKTOP UTILITIES

CDU is a collection of sixteen powerful utilities in one comprehensive package. CDU let you easily customize your desktop Macintosh to work the way you want it to. With CDU, you'll be more productive and your Mac will be easier and more fun to use.

Conserve Power

CDU is the first Mac utility to support federal guidelines on personal computing power conservation and it's completely compatible with automated network backup utilities. CDU lets you set your Mac to automatically.

Customize Your Mac

Bring your desktop to life by adding color to your Mac's windows, menus and controls. Just select from CDU's assortment of color-coordinated palettes. Personalize the backdrop of your desktop with your favorite picture.

Be More Productive

Mouseless Menus™ gives you one keystroke access to menus and dialogs. Open files with a single keystroke. Automatically type text into your document (such as the date or and address). Menus stay open until you make a selection. Background windows can be automatically hidden to reduce desktop clutter.

Preserve Your Monitor

CDU extends the life of your monitor by preventing screen phosphor burn-in. Unlike many other screen savers, CDU's screen dimmer lets you continue to see the progress of your work. CDU is also fully compatible with other commercial screen savers.

Keep Your Data Secure

CDU keeps your sensitive and confidential files save and secure — whether your Mac is switched on or off! You can even instantly hide you screen from people passing by.

HAND-Off II

For proven fast, easy, file access.

Get more done in less time with HAND-Off, the productivity tool that makes file access a snap. As MacWEEK said, "It's so good that Apple should have included it in System software."

Open files instantly using the Pop-up launch menu

The HAND-Off II launch menu lets you open any file or group of files with a single mouse stroke from anywhere. It's the most convenient way to launch documents. You

can organize files and applications your own way. For example, you can open all of the letters, charts, spreadsheets and files associated with a project simultaneously with just a click.

Locate and launch files quickly from the Apple menu

Click open any document, alias or application directly from the Apple menu. Speed through your control panels with a mouse stroke. HAND-Off II's SuperMenu™ turns the System 7.0 Apple menu into multiple levels for viewing, launching, and opening folders and files.

Substitute programs for missing applications

Say goodbye forever to the annoying "Application Not Found" message. If the application you need is missing, HAND-Off II will automatically launch a compatible substitute program. You can also pre-assign substitutions (even for DOS files) and open them with your preferred application.

Automatic Color switching

Get the color depth and sound level you want for any application. It's simple with HAND-Off II. Run your Mac in full color when you use your favorite graphics programs. Then HAND-Off II will automatically change to faster black and white mode when you switch to a word processing or spreadsheet program.

Eliminate window clutter

Moving through a maze of overlapping windows can be confusing and wastes time. Your Mac will be easier to use when you pair HAND-Off II's new AutoHide™ feature with System 7.0. AutoHide automatically hides all windows except the ones that your current application is using. By only showing active windows, AutoHide makes your desktop clean, fast, and more productive.
