Quadra 605 VRAM Problem

=====

If you buy a Quadra 605 and want to expand your VRAM, be sure to request the M1311LL/A VRAM upgrade kit. This kit is also used by the Duo Dock. The data sheet for the Quadra 605 lists the wrong number (M05017LL/A). Apple promises that dealers will be informed of the error and the data sheet will be corrected. -MCL
