BioFlix © 1993 Atomik Multimedia  All rights reserved
April 10, 1994

Background:

This demo is designed to describe the BioFlix software package.  The full program requires 22 megabytes of hard disk space, making it prohibitively large to be made available online.  Please feel free to share or distribute this demo according to the terms below.

**For proper program execution, ALL files must be present in the BioFlix.Demo folder.  Removal of any files, or renaming of files may disrupt proper program execution.**

System requirements:

This demo will operate on a Macintosh computer with the following requirements:

8 bit color
32 Bit color quickdraw
System 6.0.5 or higher
2 megs of free RAM
Quicktime system init
13" color monitor or larger

Terms of use:

This demo may be (and we encourage it) freely distributed under the following guidelines:
1.)  No files contained within the BioFlix.Demo folder may be altered, or deleted (including filenames.  Alteration of some filenames will prevent proper program execution).
2.)  No screen displays may be copied, printed, or otherwise reproduced without permission from Atomik MultiMedia.
