

Using Help...

The list of topics in this help system are listed on the left of this window. To see a topic, click once on it in the list, and the information will appear in this right hand window.

The topics are listed in the following general order:

- i. General topics & tutorial
- ii. Specific menu choices and what they do
- iii. About the calculator available in SchoolStat™
- iv. How to use the spreadsheet for manipulating your data
- v. Using the probability tables
- vi. Details of the specific statistical tests available
- vii. Details of the plotting and graphical displays available
- viii. Using the contingency routines (chi square...)
- ix. Creating customized data sets using simulations

A fuller manual is available on disc for those who pay the shareware fee, and send a disc (but note that it contains little more of substance than these on-line notes).
